*also available in long

ASPEN COLLAR

The Aspen collar is engineered to provide substantial motion restriction without producing painful pressure points that can lead to skin breakdown or poor patient compliance.

For ultimate comfort, all of the collar's contact surfaces are cushioned with cotton-lined, breathable foam padding.

Code	Size
983128	SHORT
983130	REGULAR
983132	TALL
983134	EXTRA TALL

PHILADELPHIA CERVICAL COLLAR

This collar maintains the head in the desired neutral position.

Lightweight and hygienic, it reduces pressure problems associated with more rigid collar types.

Perforated for ventilation. Trachea opening included for all sizes.

Ordering Information

PHILADELPHIA COLLAR LINERS

Cervical collar liner used to enhance patient comfort during periods of extended wear. Liners reduce shear, are easy to clean and quick drying.

Code	Size
24017B	SMALL
24017C	MEDIUM
24017D	LARGE

A-FLEX PLUS HELMETS

Made from a flexible plastic, this helmet protects from low impacts. Posterior strap "locks" the device below the mastoids and accommodates size variations. Ventilation holes reduce trapped heat. Can be easily trimmed with a pair of scissors. Custom manufacture also available.

Code	Size

SPINAL

JEWETT HYPEREXTENSION ORTHOSIS

Prevents spinal flexion, ideal for healing fractures between T8-L2. Consists of anterior thoracic and pelvic pads for comfort and a posterior thoracolumbar pad to apply a three-point force system. The brace is adjustable in width and height to adapt to various body types.

Code	Size
T37-02	SMALL/MEDIUM
T37-04	LARGE/XLARGE

PECTUS CARINATUM ORTHOSES

Provides directed anterior/posterior corrective compression used in the treatment of Pigeon Chest. The low-profile design is easily masked under clothing. A ratcheted buckle closure ensures optimal fit. One size fits most.

Code	Size
PECTUS	UNIVERSAL

RIB/ABDOMINAL BINDER

Used to provide support to the ribs and/or abdominal area.

Support of this area can reduce back pain and act as a reminder for correct posture and partially restrict motion.

The binder features an all elastic belt with pull loop and touch tape closure for correct fitting and ease of application.

Available in 15cm, 23cm & 30cm widths with four sizes each to support a variety of applications.

Ordering Information

SACRO CINCH

The OAPL Sacro Cinch reduces intradiscal pressure by increasing intra-abdominal pressure.

The device acts as a reminder to partially restrict motion and helps to prevent injury and pain. Thin flexible metal stays improve support.

OAPL STANDARD WALKER

The oapl Standard Walker is designed to immobilise the foot and ankle to decrease pain and swelling, promoting faster healing following injuries or surgical procedures

Features

- Patented metal interlocker uprights for increased support and durability of the boot. Designed to stabilise the ankle at 90° and reduce movement of the ankle.
- Velcro closures to allow custom fit to accommodate changes in volume after injury.
- A rocker sole for added comfort and ease of ambulation with a high grip sole to protect from slips.
- Breathable, moisture wicking, hand washable liner.
- EVA foot bed for impact absorption and comfort.

With a wide base and generous strap length, an orthosis can be added inside the liner to support the arch or to redistribute pressure across the plantar surface of the foot. With the use of a cohesive bandage the device works well as an instant Total Contact Cast for pressure offloading.

Information

VACOped

The VACOped boot represents the modern standard of care for foot, ankle and Achilles injuries. With the ability to provide ankle range of motion (-15° to +30°) the VACOped allows for greater freedom of movement than a plaster cast and can significantly reduce recovery times.

Features and Benefits

- Allows true plantar/dorsi flexion ankle adjustments in 5° increments. (30° PF and 15° DF)
- Offers a dynamic setting (Free ROM), allowing collagen to reform unidirectionally in the healing process of Achilles tendon ruptures
- Radiolucent - Contains no metal and is suitable for XR / MRI
- Adjustable sole length for patients between sizes
- Waterproof design: perfect for hydrotherapy (Spare changeable liners included)
- Vacuum cushion forms perfectly to individual patient's anatomy and can be adjusted to accommodate swelling and atrophy.

Code	Size
VPED-S	SMALL
VPED-M	MEDIUM
VPED-L	LARGE

Clinical Studies

VACOcast

The VACOcast is a cast stable orthosis for the immobilisation of the foot and ankle. Therapy with VACOcast accelerates the healing process and makes earlier weight bearing possible.

Features and Benefits

- Vacuum cushion forms perfectly to individual patient's anatomy and can be adjusted to accommodate swelling and atrophy
- Shortening of in-patient admission time
- Facilitates earlier weight bearing
- Adjustable sole length for patient between sizes
- Waterproof design: perfect for hydrotherapy (Spare changeable liners included)

Code	Size
VPCA-S	SMALL
VPCA-M	MEDIUM
VPCA-L	LARGE

VACOpedes

The VACOpedes is the modern standard of care for injuries to the metatarsal and forefoot. Optimum pressure relief in the forefoot means the healing process is accelerated and the patient gets back to everyday life sooner.

Features and Benefits

- Pressure relief in the forefoot area
- Immobilisation of the forefoot with full mobility in the ankle
- Adjustable sole length
- The orthosis can be taken off and put back on again at any time
- Easy wound control simplifies treatment
- Radiolucent - Transparent in X-Rays

POST OP & WOUND CARE SHOES

LEIPZIG

Rehabilitation shoe with flexible sole, three inlays can be adjusted or removed. The patient can wear the shoe with wound dressings as the dorsal fasteners offer generous adjustability. Leipzig shoe features a reinforced heel counter, zippers in the heel to Achilles tendon area and adaptable insoles that offer local pressure relief. Adhesive felt works well in the Leipzig for pressure offloading.

Ordering
Information

HEIDELBERG

A rehabilitation shoe with quality flexible walking sole. Features velcro straps to customise the volume and tightness around the midfoot. Made with a neoprene top and plush lining with 3 removable insoles made of EVA and a slip resistant sole. This shoe is suitable for patients with wounds to the forefoot area and swelling.

Ordering
Information

KASSEL

A wound care shoe with increased ankle support and a rigid sole to stabilise the patient's foot to reduce shear on the plantar aspect of the foot.

Ordering
Information

DIABETIC INSOLE

Medical grade insole with 3 layers of comfort. Consisting of a plastazote top cover that reduces friction and absorbs shock, a foam inner layer that cushions the foot and a soft polyurethane base to provide arch support.

IMAK ELBOW PM SPLINT

Gently immobilises the elbow and prevents painful movements during sleep. Made from a soft fabric, breathable foam, and cotton lining. Universal sizing.

Code	Size
A10172	UNIVERSAL

TRIPOD WRIST

'Tripod' refers to the ulnar, palmar, and dorsal aluminium stays, which restrict radial-ulnar deviation and minimise flexion-extension of the wrist. The dual lace closure system allows for easy one-handed application. Made of perforated suede and felt lining allows moisture to evaporate away from the skin and the unrestricted motion of the fingers and thumb enhances patient compliance.

Indications

- Post fracture care
- Post-operative care
- Carpal tunnel syndrome
- Wrist sprains or strains

HEALPRO BED RESTING AFO

A foot and ankle positioning orthosis designed to offload the heel and protect the foot from potential ulcers and/or loss of dorsiflexion range of motion. This unique design suspends the heel and reduces pressure on the toes from bed linen to facilitate comfort and protect skin. Designed primarily for patients spending long periods of time in recumbent position, the HealPRO can improve clearance in swing phase and promote a neutral position during stance for limited ambulation.

Code	Size
3530	SMALL
3531	MEDIUM
3532	LARGE
3533	XLARGE

RCAI MPO ACTIVE 2000

Dynamically improves foot and ankle contractures and provides heel clearance for pressure relief. The rotator bar controls hip and leg rotation and an adjustable post relieves pressure on the toes. This brace can be worn in bed or when transferring with the addition of an ambulatory attachment. Made of a breathable foam liner that wicks moisture away from the skin for comfort.

HEELIFT SUSPENSION BOOT

Available in smooth or convoluted (original) foam. The Heelift Suspension Boot is designed to provide an effective solution for prevention and assistive healing of pressure ulcers at the heel, while delivering positioning and alignment of the lower limb. It is made from latex free medical grade foam with a friction free tricot base to ensure it stays in place at all times as well as improving client mobility. Comes with an extra pad to control hip rotation, foot drop or provide added elevation. One size fits all.

Code	Variation
11022	CONVOLUTED
11023	SMOOTH

OAPL HEEL CUSHION

The brace is a cost-effective device ideal for protecting the diabetic foot, heel and ankle. Designed to enable easy donning and doffing with a 'foot section' tag ensures that the device is being donned in the correct orientation every time. The heel cutout allows the clinician to visually check the heel is being offloaded. The brace comes with de-rotation wedge which secures the position of the foot to protect from unwanted pressures and hip rotation.

OAHC	UNIVERSAL

RHINO 'CRUISER' HIP ABDUCTION BRACE

A moulded polypropylene orthosis with foam lining to treat infants and children with hip dysplasia. Holds hips in the correct abduction position, but flexible enough to allow walking. Anterior velcro closures strap around the abdomen and thigh shells.

Ordering Information

PAVLIK HARNESS

The Orthotykes Pavlik Harness is designed for infants with developmental dysplasia of the hips (DDH). The harness holds the hip in the most stable position with the femoral head located in the acetabulum. Designed to maintain the hips in desired degree of flexion and abduction whilst encouraging active motion.

Code	Size
160160	NEWBORN
160170	SMALL
160180	MEDIUM
160190	LARGE

BEBAX BOOTS

A progressive and dynamic correction option for paediatric metatarsus adductus. These boots are made of soft leather and Velcro for comfort and durability. A swivel hinge on the base of the boot controls the positioning of the foot. The hinge uses screws with an allen key to lock-in the foot position and allows gradual adjustments to straighten the forefoot and heel. This makes for a great alternative to serial casting.

Ordering Information

SMARTKNIT AFO SOCKS

Seam-free, Non-binding, wrinkle free socks that are great for use with AFOs. Made of a core-spun polyester to wick away sweat and reduce friction causing blisters. Available in both adult and paediatric sizes.

Ordering Information

OAPL TRAVEL SOCKS

Minimise the risk of deep vein thrombosis (DVT) from forming in the legs during travel. These socks are ideal for tired or achy legs, ankle swelling and moderate to pronounced varicose veins. They feature graduated compression (14-18 mmHg) and are a hospital grade anti-embolism stocking made from a nylon, lycra and spandex blend.

Ordering Information

OAPL TRACTION SOCKS

Increase grip whilst walking to help prevent falls when unable to wear shoes. The socks feature a slip resistant sole on a lightweight breathable sock. They are a latex free product constructed from 80% Acrylic and 20% Nylon material.
