

## Cover circumference in [cm]

36 ☐

38 ☐

40 ☐

42 ☐

We recommend reducing the FlexCover circumference by a few percent, and even above ten percent for a very large calf. According to our customers' opinion, the FlexCover looks good with a circumference of less than 40 cm

For joints such as Genium, Genium X3, C-Leg4, Rheo the minimum circumference is 38 cm.

## The height of the knee in the range of 32-53 cm in [cm]

We measure from the level of the foot shell to the top of the knee. The gap between the cover and the foot will be taken into account by us, depending on the type of foot.

Additionally, the covers can be shortened by a few cm.

In the case of a parabolic foot shell, the height measurement must take into account the lowest point. In this case, the cover should be ground by yourself to the shape of the foot.

## Foot manufacturer, type and size

For example : OB Taleo 1C50 L29

## Knee manufacturer and type

For example : OB 3R80

## Four photos on each side.

The camera must be placed perpendicular to the legs, in a low position, and both legs must be centered on the photo.

- All our covers can be shortened from the bottom by several mm.
- In the factory state, the lower part of the cover is flat.
- In the case of the foot as shown in the picture, the lower part of the cover can be ground to the shape of the foot.
- If something is incomprehensible, look at our videos on the website in the menu - "VIDEOS"
