

# More than just an online ordering portal

# The Juzo Medical Products' Portal

# Register now at portal.juzo.com

In addition to our online ordering portal, you can view our product world and the latest offers at any time as well as receive first-hand information about new products and services.

#### Your benefits

- + 24/7 service on all devices
- + 100% secure data transmission via SSL encryption
- + one click to order more
- + quick and easy quote process

# No time to wait?

#### To register for access, all you need is:

**Customer number** 

Company name

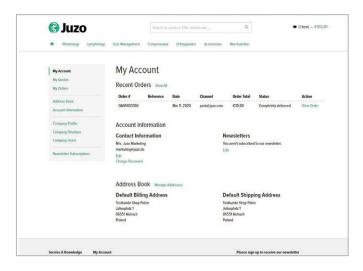

Post code

Set up account

Your account will be reviewed and activated by our Customer Service without delay.

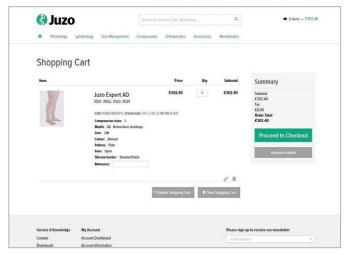

#### User account – everything at a glance

- + all orders at a glance
- + delivery status of your orders
- + order information
- + address and account management

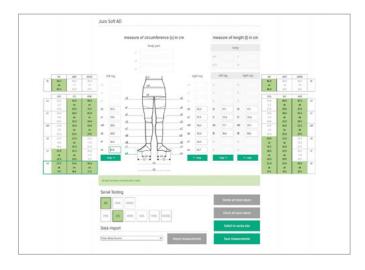

#### **Quote benefits**

- + quick and accurate generation
- + receive the offer immediately at any time
- + request a quote without measurements
- + order with one click after approval

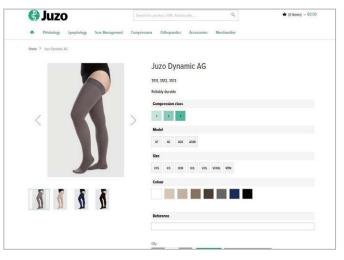

#### **Body measurement & routine checks**

- + measuring guide
- + intuitive checking for the right standard sizes
- + detailed documentation per garment in PDF format

#### **Re-ordering**

- + easy search of your orders
- + quick and easy changes to measurements and properties
- + can be re-ordered as often as needed

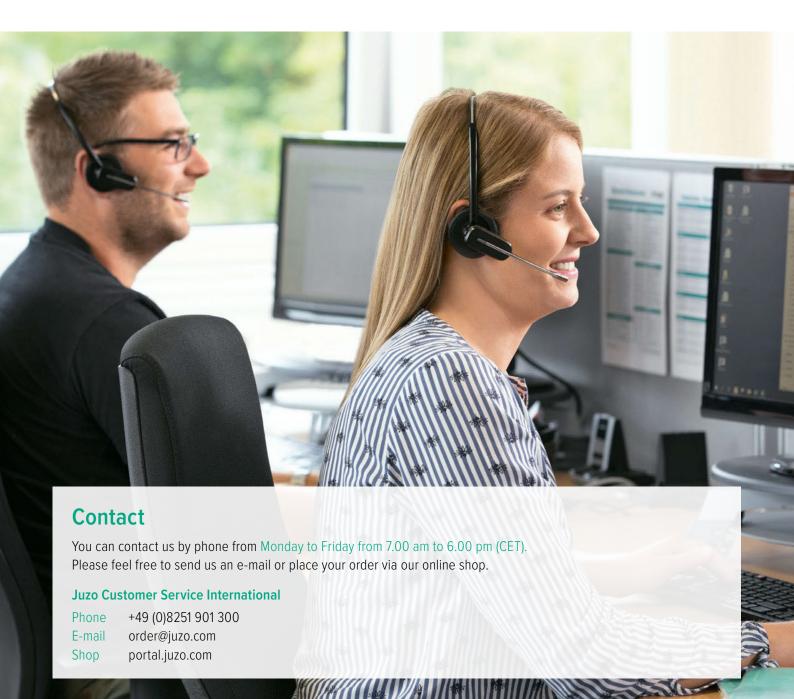

# **Customer Service department**

# Juzo - Always there for you

Engaging, friendly and competent – that is how our customers describe us. We look after our customers with a smile and genuine interest in their wishes. Our goal is to answer their needs as best as possible, which is why we are always on the lookout for new, optimised solutions. In these efforts, we rely on our experience and our unique expertise, which we continue to develop further every day. We are always there for you with help and advice – not just to fulfil our own claims – but to assist you in supporting the therapy success of your patients with the right products. We are looking forward to your call and finding a solution that's right for you – because "Can't be done" is never an option for us!

# **Our Customer Service department offers:**

- + general information
- + individual product advice
- + order acceptance
- + feedback on the status of your order
- + advice on questions about compression therapy

# **Medical compression garments**

# The 4 pressure levels

Medical compression stockings from Juzo guarantee correct pressure values and a well-defined pressure gradient. The pressure decreases continuously from the ankle section upwards towards the heart, and also towards the toes. We can provide a wide variety of garments, from below-knee stockings to pantyhose, from gloves to face masks, depending on the therapeutic application.

Compression fabrics are categorised into 4 compression classes (CCL) based on the level of compression in the ankle or wrist area according to the quality seal RAL. Possible indications can be, for example:

# $\cdot$ minor obstructive disorders accompanied by feelings of tiredness or heaviness in the legs · isolated varicose vein formation · prevention of health problems during pregnancy 23 – 32 mmHg (CCL 2) – moderate compression varicose veins · leg swelling during pregnancy · after varicose vein sclerosis or operations · for the long-term treatment of healed leg ulcers · propensity for oedema formation exists 34 – 46 mmHg (CCL 3) – strong compression · varicose veins accompanied by damage to the deep leg veins · after healing of venous crural ulcers · severe swelling tendency of the legs · chronic venous insufficiency · severe propensity for oedema formation > 49 mmHg (CCL 4) – very strong compression · severe lymphatic obstructions

· lymphoedema with fibrosis

# **Quality standards**Verified quality

#### Oeko-Tex® Standard 100

"Oeko-Tex Standard 100" is a globally-standardised and independent testing and certification system that applies to all stages of processing, from raw materials through to the intermediate and final product. The more intensive the skin contact, the stricter the requirements that must be met.

All Juzo compression fabrics, both the circular knitted and flat knitted varieties, have been awarded the "Oeko-Tex Standard 100" label for textiles. This enables the company Juzo to guarantee that all components that go into a product are harmless to humans and the environment.

#### Quality seal RAL

Medical compression stockings from Juzo comply with the relevant RAL standard. The test specifications contain a comprehensive set of binding guidelines on the manufacture of medical compression stockings and sleeves, for example:

- · material characteristics (harmless to humans)
- · periodic quality inspections, for example by the Hohenstein Research Institute
- · rubber-elastic properties in lengthwise and crosswise directions
- · compression classes 1-4 (for sleeves compression classes 1-3)
- · manufacture of custom-made and standard sized stockings

#### ISO certification

Juzo implemented its general quality management system back in 1998, and was one of the first companies in this industry to be certified to EN ISO 9001 and EN 46001. Juzo is currently certified to DIN EN ISO 9001 and DIN EN ISO 13485, which superseded EN 46001.

# **Juzo Inspiration**

Art. 2701, 2702, 2781, 2782

#### Lifestyle, design and medical effectiveness elegantly combined

- fine, discreet mesh design, narrow top border and decreased heel
- perfect support thanks to the elastane thread in the knitted fabric that lies directly on the skin
- the reinforced sole of the foot protects the foot area
- available as pregnancy pantyhose with elastic and adapting body part
- variety of options available: colour gradients, unique patterns, variety of colours

#### **Juzo Ulcer Pro**

Art. 3073, 2571

#### A system for treatment success

- compression stocking system for easier treatment of leg ulcers
- can be used as soon as circumference fluctuations have settled down during treatment
- set offers secure support even during movement and is comfortable to wear in closed shoes
- · comprises two types of compression stockings which complement each other perfectly: the circular knit Juzo Ulcer Liner (< CCL 1) and the flat knit, short-stretch Juzo Ulcer Expert as a cover-stocking (CCL 2).

#### Characteristics

#### Flat knit with seam

#### Application area Phlebology

- Features + defined pressure values
- + perfect fit
- + adds up to CCL 3

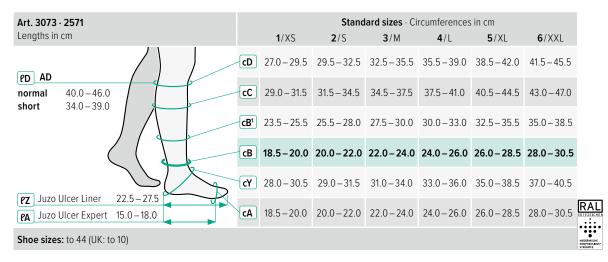

#### Treatment area

+ lower limb

#### Compression

34-46 mmHg (CCL 3)

#### Size chart

### **Juzo Ulcer System**

Art. 3573, 2561

#### The efficient duo for ulcer treatment

- important aspects of treating venous leg ulcers: 1. protection of sensitive skin areas when donning, 2. high level of compression
- beige Juzo Ulcer Liner (< CCL 1) is easy to put on and perfect for securing wound dressings and protecting the skin
- Juzo Ulcer Dynamic (CCL 2) is then put on as an over-stocking
- when worn as a set, the overall compression achieved is CCL 3
- can be worn day and night during treatment, thus it is supplied as a set of two so it can be changed
- inconspicuous look and comfortable when worn in shoes

#### Characteristics

# Circular knit without seam

# **Application area** Phlebology

#### Tillebology

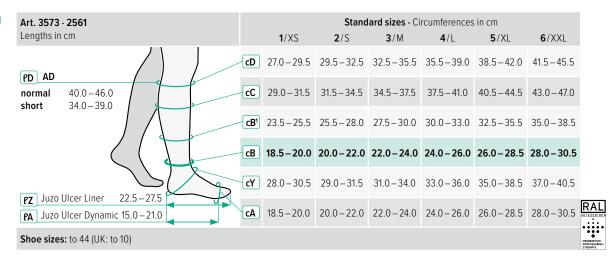

- + flexible knitted fabric
- + discreet look

#### Treatment area

+ lower limb

Compression 34-46 mmHg (CCL 3)

## **Juzo Classic Seamless**

Art. 2301, 2302

#### Smooth and comfortable

- optimal for treatment of oedemas and post-traumatic swelling
- using special high-tech knitting techniques, different zones are equipped with the desired properties
- the soft knitted fabric perfectly adapts to the patient's anatomy
- pleasant skin climate thanks to breathable material
- lengthwise structure makes the product easy to slide on during donning and provides additional stability
- borders at top and by toes and fingers are particularly soft and flexible, thus preventing constriction and pressure points

#### Characteristics

#### Flat knit Seamless

## Application area

## Lymphology

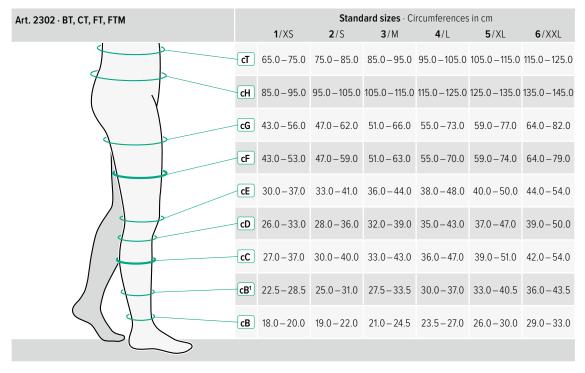

- Features
  + especially thin and stable fabric
- + breathable for a comfortable skin environment
- + smooth

#### Treatment area

- + lower limb
- + upper limb

Compression 18 – 21 mmHg (CCL 1) 23 – 32 mmHg (CCL 2)

## **Juzo SoftCompress**

## Compression bandaging

## Padding for oedema therapy

- vertical foam channels create a unique surface structure and provide perfect pressure distribution, supporting lymphatic drainage
- padding underneath the compression garment can prevent pressure points and skin damage
- particularly skin-friendly and comfortable material thanks to cotton surface
- bandaging aids for arm and leg are easy to use and ideally suited to self-therapy
- can be worn under short-stretch bandages or in combination with Juzo ACS Light or Juzo Compression Wrap
- inserts and pads can selectively increase compression for particularly localised oedema

#### Characteristics

## **Bandaging** system

**Application area** Lymphology

## Features

- breathable
- + cotton surface
- + targeted increase in pressure
- + washable material

#### Treatment area

- + lower limb
- + upper limb

## **Juzo SleepCompress**

## Compression system

## The perfect good-night garment

- designed for the use during maintenance phase of oedema therapy
- perfect addition to a flat knit compression garment
- secures the treatment success at night and during rest phases
- for even more effective and comfortable oedema therapy
- models itself on the lymphatic pathways
- foam channels guide and support lymphatic drainage for decongestion
- reducion of oedematous swelling and the feeling of tension

#### Characteristics

Application area Lymphology

#### Features

- + quick and easy donning
- + cooling material + foam channels follow lymphatic pathways

#### Treatment area

## **Juzo ACS Light**

## Adjustable compression systems

## Compression systems for decongestion

- short-stretch compression wraps
- · used as efficient alternative or addition to conventional compression rolls during decongestion phase
- therapeutic compression up to 40 mmHg
- touch fasteners allow individual adjustment to fluctuating body circumferences
- easy to secure and put on thanks to integrated lining on the arm, thigh, knee and calf wrap
- adhesive borders on the inside prevent the product from slipping
- easy to use and ideal for self-treatment
- high level of wearing comfort promotes patient compliance
- can be worn during day and night

#### Characteristics

#### **Adjustable** compression Wrap system

#### Lymphology

Phlebology

#### **Features**

- + short-stretch, comfortable material
- + perfect fit

# Iron-on patches Julius

For Juzo Expert (Silver/Cotton) and Juzo Expert Strong (Silver/Cotton)

# General Terms and Conditions of Delivery and Payment

# for the Sale of Goods by Julius Zorn GmbH

#### 1. Scope, General.

These Terms and Conditions of Delivery and Payment shall apply to all business relations of Julius Zorn GmbH (hereinafter the "Supplier") with a commercial customer (Sec. 14 German Civil Code ("BGB")) (hereinafter the "Customer") even if not specifically mentioned in later contracts. They shall also apply where Customer refers to its own terms and conditions of business, in particular if Customer does so when placing the order. Any departure from Supplier's Terms and Conditions of Delivery and Payment requires Supplier's explicit written approval.

The parties to the contract hereby conclude a processing contract. You can view the relevant contract pursuant to GDPR, including the appendices required by law, on the supplier's website at juzo.com/gdpr after you have successfully signed in through the login area. The parties to the contract agree that the order data processing contract in this form, including appendices, shall become an integral part of the contract.

#### 2. Supply Agreement.

(1) All deliveries are made at Customer's risk by a shipping service provider instructed by Supplier.

(2) Deliveries or parts of deliveries will be delayed in the event of force majeure (i.e. circumstances and events which cannot be prevented by exercising the due care required for proper management), in case of measures relating to industrial action, in particular strike or lock-out, as well as in the event of unforeseeable obstacles beyond Supplier's control, e.g. operational breakdown, delays in the supply of essential materials. The foregoing shall also apply where those circumstances occur at Supplier's suppliers. The delivery period will be extended according to the duration of such measures and obstacles. Supplier is not responsible for such circumstances even where they occur during an already existing default. Supplier will communicate the beginning and end of such obstacles to Customer as soon as practicable, where important.

(3) All descriptions and images are non-binding unless they are expressly marked as binding. Designs and forms are subject to change as a result of technical progress or legal requirements during the period of delivery, provided the item to be delivered is not materially changed and the change is reasonably acceptable to Customer.

(4) If Customer desires a specific shipping service provider, Supplier will pass on all relevant costs. An increase in costs beyond our control may result in an adjustment of the amounts indicated. Partial shipments made by us are allowable and are free of charge.

(5) If Customer cancels an order already placed without being entitled to such cancellation, Supplier may claim 25 % of the sales price to compensate the costs incurred for processing the order and lost profit, without prejudice to its right to claim any higher damage actually suffered. Customer may prove that less damage was suffered.

(6) Custom made garments, made to measure garments, custom and special designs, dip dye, trend colour or Batik Collection stockings cannot be returned.

#### 3. Prices, Payment.

All prices are in Euros ex works, plus VAT as applicable from time to time. Payment to be made immediately after presentation of the invoice. First deliveries are only made against advance payment. In the event of a default in payment by Customer, e.g. resulting from Customer's failure to make payment within a given period, subject to additional claims for damages, interest will be charged at the standard bank lending rate, but in any case at a minimum of 8 percentage points above the basic interest rate as applicable from time to time, pursuant to Sec. 247 BGB. In the event of default in payment, or if Supplier has reason to doubt Customer's ability to pay or credit-worthiness, Supplier may — without prejudice to any other rights — demand security or advances for any outstanding deliveries and call for immediate payment of all claims resulting from the business relationship. If Customer is a merchant in accordance with Sec. 1 German Commercial Code (HGB) (Kaufmann), a legal person under public law (juristische Person des öffentlichen Rechts), or a special fund under public law (öffentlich-rechtliches Sondervermögen), Customer is entitled to set-off or retention only in respect of claims which are undisputed or have been established by valid and final judgment.

#### 4. Warranty, Exclusion of Liability.

The delivered goods are to be carefully inspected for visible defects (including incomplete or incorrect delivery) immediately after delivery to the Purchaser or to the third party designated by them.

If a defect becomes apparent during the inspection or if a defect, which was not visible during this inspection at the time of delivery, becomes apparent at a later date, the Purchaser shall give notice of this immediately at the time of discovery. The notification is only immediate if it is made within seven (7) working days after delivery, from the time of discovery, or from the time at which the defect would have been discovered in the course of a reasonable inspection. If goods are defective, Customer may claim remedy of defects or substitute delivery. In the event of two failed attempts, i.e. impossibility, unreasonableness, refusal or immoderate delay of the repair or replacement delivery, the Purchaser may withdraw from the contract or reasonably reduce the purchase price. Rejected goods may only be returned with the prior express consent of the Supplier. For hygienic reasons, the Supplier can only accept new or washed goods for repair or modification. Supplier shall not be liable for damages based on contractual or quasi-contractual claims, tort or other legal grounds; the foregoing shall not apply to damage claims arising from an injury to life, body or health or to any violation resulting from intent or gross negligence of Supplier or its vicarious agents or in the event of a violation of a material duty, the performance of which is essential to the contract's purpose. In the latter case, liability for slight negligence shall be limited to foreseeable damage typical for this kind of contract.

#### 5. Retention of Title.

Until full payment of Supplier's claims arising from the business relationship with Customer, the goods sold shall remain the property of Supplier. However, Customer may dispose of the goods purchased in the ordinary course of business. If Customer is in breach of contract, in particular in the event of default in payment, Supplier is entitled to collect, and Customer is obliged to surrender, the goods after a reminder. The assertion of retention of title or the attachment of the items delivered by Supplier shall not be considered a rescission from the contract. Any claims against third parties resulting from the resale of the goods delivered are hereby collectively assigned to Supplier by Customer as security, irrespective of whether the items delivered were resold with or without prior processing. Customer will still be authorised to collect such claims, despite the assignment agreed herein. The foregoing shall be without prejudice to the authority of Supplier to collect such claims on its own; but Supplier undertakes not to collect such claims, unless Customer fails to properly meet its payment obligations and is in default of payment. Otherwise Supplier may demand Customer to disclose the claims assigned and their debtors, to provide all information necessary for collection, to surrender all relevant documents, and to communicate the assignment to the debtor (third party). Customer may not attach, or transfer as security, the items delivered. In the event of attachment or seizure or other disposal by a third party, Customer shall inform Supplier of the same without undue delay, providing all information and documents necessary to safeguard Supplier's rights. Enforcement officials or third parties shall be advised of the Supplier's retention of title. If the value of security exceeds the claim of Supplier by more than 20%, Supplier will release security upon Customer's request to such extent at its discretion.

#### 6. Provisions with respect to Regulation (EU) 2017/745.

6.1 Role of the Supplier and the Customer

Within the scope of these Terms and Conditions of Delivery, the Supplier adopts the position of manufacturer in accordance with Art. 2, No. 30 of Regulation (EU) 2017/745 and the Customer adopts the position of distributor in accordance with Art. 2, No. 34 of Regulation (EU) 2017/745.

6.2 Distributor's obligations

The Customer undertakes to comply with the obligations imposed on it as a distributor in accordance with Art. 14 Regulation (EU) 2017/745.

6.3 Traceability

The Customer and the Supplier shall work together to guarantee the traceability of the goods.

The Customer undertakes to ensure that it is able to provide information to the responsible authorities at all times about who provided the goods and/or to whom it sent the goods after it has handed over the last goods for a period of ten (10) years in accordance with Art. 25, Para. 2 Regulation (EU) 2017/745. In this respect, the Purchaser undertakes to set up a procedure suitable for this provision of information and to document the procedure in accordance with clause 7.5.9 ISO 13485:2016, or the respective current version of ISO 13485.

The Customer undertakes to hand over the suitable documentation for the provision of information to the Supplier after the ten (10) years mentioned have elapsed or to dispose of it properly following a written request from the Supplier.

The Customer undertakes to comply with the obligations regulated in 6.3 even if business operations cease before the ten (10) years mentioned have elapsed or if insolvency proceedings are initiated against it.

6.4 Acceptance and Documentation of Experiences, Findings and Other Information about the Goods

The Purchaser undertakes to pass on to the Supplier without delay all experiences and findings about the goods, including trends to be observed, and all complaints or reports of suspected incidents in connection with the goods that they receive. In this respect, the Customer undertakes to establish a suitable procedure for the acceptance of such experiences, findings, complaints or reports about the goods, and their documentation and keep this documentation up to date.

The Customer undertakes to hand over documentation regarding experiences and findings about the goods, including trends to be observed and incoming complaints or reports to the Supplier after the ten (10) years mentioned have elapsed or to dispose of it properly following a written request from the Supplier.

The Customer also undertakes to comply with the obligations regulated in 6.4 even if business operations cease before the ten (10) years mentioned have elapsed or if insolvency proceedings are initiated against it.

6.5 Forwarding of Experiences, Findings and Other Information to the Supplier

The Customer undertakes to forward all experiences and findings about the goods, including trends to be observed and all incoming complaints or reports about suspected incidents in connection with the goods to the Supplier without delay or to forward it to a person specified by the Supplier. The forwarding is to be carried out in writing to Julius Zorn GmbH, Juliusplatz 1, 86551 Aichach, Germany. In the case of suspected serious incidents in accordance with Art. 2, No. 64 Regulation (EU) 2017/745, information shall be passed on in advance by telephone +49 (0)8251 9010, fax +49 (0)800 08 35 393, or e-mail rueckmeldung@juzo.de.

#### 6.6 Advertising

The Supplier shall make all materials for the advertising of the goods (e.g. texts, names, trademarks, illustrations and other symbols) available to the Customer if the Customer is performing the advertising of the goods. The Customer undertakes to exclusively use the materials provided by the Supplier for advertising the goods.

#### 7. Returns

Outside the warranty, the supplier, for reasons of goodwill, offers the option for customers to return delivered goods in exchange for a credit note to the order value or a replacement (return), although this does not mean that the purchaser is entitled to this. Such returns require the prior consent of the Supplier and agreement (notification) in each individual case, whereby the perfect condition of the goods is assumed. Custom-made solutions, special products and designs, modified packaging units (e.g. removal of items from packaged pairs), products in trend colours, as well as items from the Dip-Dye and Batik Collections are excluded from the returns policy. The returned goods must be in a saleable condition (unworn, undamaged and clean). The supplier reserves the general right to refuse returns. When items are returned, the purchaser must provide the supplier with evidence of receiving the goods. Specifying the delivery note number and date in the form of a copy of the delivery note or enclosing the relevant return dispatch note suffices. The Supplier will only accept goods (outside of any warranty) in their original packaging and up to 90 days after the delivery date. For returns between 91 and 180 days after the delivery date, the supplier will charge a processing fee of 20% of the net order value. A return 180 days or more after the delivery date cannot be accepted for replacement or in exchange for a credit note. The costs for the return shipment shall be borne by the Purchaser. Please note that replacement products such as pads, metre lengths of silicone border and similar items must be exclusively used within the original intended purpose of the medical product. Replacement products are solely intended to restore the compliant condition of the goods as declared by the manufacturer. Our product specialists are happy to help you with questions about correct use or donning.

#### 8. Jurisdiction; Applicable Law; Severability.

The Regional Court (Landgericht) of Augsburg shall have jurisdiction over all disputes arising from this contractual relationship if Customer is a merchant in accordance with Sec. 1 HGB, a legal person under public law, or a special fund under public law; Supplier is entitled to bring action also at Customer's principal place of business. German law shall apply exclusively, to the exclusion of the law on the international sale of movable goods (CISG), even if the Purchaser has their registered office abroad. If one of the provisions above is or becomes null and void, in whole or in part, the validity of the remaining provisions shall remain unaffected thereby.

Subject to change. No liability for errors.
