Thigh Sleeves*

1/8 Atrophy Thigh Sleeve 1/16 Comfort Thigh Sleeve

Please provide the three measurements, below, so we can determine the most appropriate standard size BOLD brace to ship. The knee width M-L is the PRIMARY measurement because the central aluminum structure is very rigid and not easily adjusted. The leg circumferences are SECONDARY reference measurements, as the semi-rigid nylon shells will generally contour to the leg when the thigh and tibia straps are tightened. For a disproportional leg, consider using a "custom assembled" Townsend Rebel or Rebel Pro brace.
