Pneu-Trac Traction Collar

- Lightweight, pneumatic, mobile cervical traction device
- Semi-rigid polyethylene construction
- Provides static or intermittent, patient controlled cervical traction
- Height adjustable
- Includes hand pump

Indications: Cervical Radiculopathy, muscle spasms, pressure from compressed nerve roots, arthritis

Selection

Model No.	Size	Height	Neck Circumference
A26700	Small	7.5-12.7 cm / 3-5 in	31-36 cm / 12.2-14.2 in

Malibu Cervical Collar

- Lightweight heat moldable Kydex® shell with soft, closed-cell foam liner
- Rigid support controls flexion, extension and rotation
- Independently height-adjustable anterior and posterior sections
- Trachea opening
- MR Safe
- Thoracic extension and fabric liners available
- Includes 2 chin pads

Indications: Cervical spine precaution for trauma patients, immobilization for pre and post cervical spine surgery, degenerative disorders, Spinal Stenosis, Spondylolisthesis, ligament/muscular injuries, Rheumatoid Arthritis, degenerative joint disease and nerve impingements

Warranty	90 days
Includes	Pad Sets

Lerman Non-Invasive Halo

- Secure cervical stabilization
- Color coded buckles for ease of application
- Designed to be donned/doffed in supine position to simplify fit
- Removable anterior plate for emergency Cardiopulmonary Resuscitation
- MR Safe
- Polyethylene / composite plate material
- Pad set included

Indications: Cervical spine immobilization of stable, non-displaced or minimally displaced fractures

Selection

Model No.	Size	Sizing
A37802	Adult	One Size Fits Most

Gunslinger II

- Low density polyethylene shell with washable pads and liners
- Numbered, quick snap release buckles
- Universal sizing reduces inventory
- Variable abduction, adduction and forearm rotation based on height and position of the forearm component
- Extended forearm attachment provides increased variable abduction

Indications: Reconstruction surgery/shoulder replacement, traumatic injuries/fractures to the proximal humerus and shoulder, reduction of shoulder luxation, post operative repair of rotator cuff, Bankart lesions

- Rigid frame encased in firm foam shell provides moderate to firm thoracolumbosacral support
- Pendulous front cups abdomen for additional support
- Adjustable prefabricated shells with modular abdomen offer a semi-custom fit
- Rigid anterior plastic panel
- Easily shaped without tools

Indications: Post-op immobilization, lumbar stabilization, burst fractures, compression fractures, spinal stenosis, spondylolysis

Selection

Model No.	Size	Hip Circumference
LS221-03	Medium	86-94 cm / 34-37 in

LS221-05	X-Large	112-120 cm / 44-47 in
LS221-06	XX-Large	124-132 cm / 49-52 in

Titan LSO/TLISO/CTLISO

- Provides anterior, posterior, lateral and rotational control (APL&R)
- Fully adjustable
- Washable foam liners and removable foam lumbar pad
- Rigid, off-the-shelf body jacket
- Available in male and female designs

Indications: Post-operative immobilization, lumbar stabilization, burst fracture, compression fracture, spinal stenosis, spondylolysis, and other spinal conditions

Lenox Hill Precision Pro OA Single or Double Upright

- Technologically advanced hinge design allows for quick and dynamic adjustments on unloading forces
- Anterior distal shell improves unloading and rotational forces by anchoring on the tibia
- Lightweight, aircraft aluminum frame can be easily contoured by hand when fitting
- Ergonomically designed strapping system for easier donning by patient
- Silicone coated pads reduce migration

Indications: Provides a corrective force to help reduce pain and joint degeneration

- Includes** Hex Key, Tibial Pad (2)

Matrix Max 2

- Easy-Trim foot plate allows fitting of up to 3 shoe sizes with one product
- Advanced reinforced lateral strut for greater stability, durability and energy return
- Narrower foot plate in the medial arch allowing for an easier shoe fit
- Heat-moldable, trimmable and height adjustable anterior shell
- Shrink tubing along the lateral strut protects the shoe against damage

Indications: Low to high activity patients with unilateral or bilateral drop foot; suitable for partial foot amputations

Selection

Model No. Left	Model No. Right	Size	Height	Foot Length
FH260L-02	FH260R-02	Small	39-42 cm / 15.5-16.5 in	22-24 cm / 8.5-9.5 in

FH260L-05	FH260R-05	X-Large	43-46 cm / 17-18 in	29-31 cm / 11.5-12.2 in

- Toe plate easily trimmed with regular scissors
- Narrower foot plate fits easier in the shoe
- Heel plate easily trimmed with regular scissors

Matrix SuperMax

- Enhanced integration of the foot plate and strut for added durability and support
- Footplate is uniquely designed to allow greater energy reflection at toe off
- Streamline to fit in shoes better
- Shank angle increased to 82° to improve knee extension movement at mid stance
- Heat-moldable, trimmable and height adjustable anterior shell

Indications: Low to high activity patients with unilateral or bilateral drop foot; peroneal nerve palsy; incomplete paralysis; CVA and CMT

Warranty

Trulife warrants each of its orthotic devices subject to conditions below, to be free from defects in material and workmanship under normal use, service, and proper installation, for the time period specified below:

If failure of a purchased product occurs during this period because of a defect in material or workmanship, upon satisfaction of the conditions set forth below, Trulife will replace, repair, or refund the product at no charge to the original retail purchaser. Your sole and exclusive remedy, as the original retail purchaser, in the event of a defect is found, is expressly limited to replacement or repair of the product, although Trulife may elect to refund, not to exceed the purchase price, rather than replace or repair the product. Replacement products are warranted for only the remainder of the original warranty period. Warranty is nontransferable and may only be exercised by the original purchaser.

The limited warranty contained herein is in lieu of all other written or expressed warranties. Any implied warranty, including the implied warranties of merchantability or fitness for a particular purpose, is limited in length to the duration of this limited warranty. Some states do not allow limitation on how long an implied warranty lasts, so the above limitation may not apply to you. Trulife's sole responsibility is to replace, repair, or refund as stated herein, and Trulife shall not be liable for any special, indirect, or consequential damages including loss of time, inconvenience, loss of the use of the product, or commercial losses. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. The application instructions/fitting guidelines for this Trulife product are for the use of and by certified, qualified orthopedic professionals only.

Patients are not to attempt to apply or adjust any brace unless expressly instructed to do so by the orthopaedic professional responsible for the prescription and/or initial fitting of the orthosis. All questions should be referred to the orthopaedic professional and not to the manufacturer. The manufacturer warrants only that the enclosed orthosis has been inspected for quality and can be effective for certain indications, but final decisions and ongoing monitoring must be made by the orthopaedic professional(s) prescribing and/or fitting the orthosis to determine its effectiveness for an individual patient. Patient compliance is an integral part of the entire orthotic protocol and must be adhered to in order to avoid potential problems and to maximize the effectiveness of the prescribed treatment.

As a condition of the sale of any Trulife product, the orthosis is restricted to a "Single Patient Use Only" by the originally fitted patient in order to protect the care provider and the patient against potentially adverse consequences of infectious disease transmission, material instability in adapting to the configuration of the original user and/or decrease in orthotic therapy. Any express or implied warranties are voided if the orthosis is attempted to be reused. Additionally, a license of right to use under any relevant patents pertaining to the orthosis is terminated with the cessation of use by the original patient. As with all Trulife products, this orthosis must be prescribed and applied by a qualified orthopaedic professional to determine it meets the needs of the particular patient and accomplishes the desired results.
