Lower Limb Prosthetic Solutions

Our founder, Hugh Steeper, was a pioneer in the field of prosthetics; paving the way for innovations that would change the lives of Great War veterans. Today, the Steeper name continues to create positive turning points for patients and clinicians in need of ever more inventive prosthetic solutions.

Partnerships with world-class manufacturers

To provide complete coverage across our prosthetic product portfolio and to offer clinical independence to clinicians and patients, we partner with a hand-picked selection of world-renowned manufacturers to bring the world's best lower limb prostheses to the UK.

Before we introduce them to the UK market, each product in our portfolio is evaluated by the Steeper Clinical Support Group with clinicians and patients. To read the evaluations for these products please visit our website.

Catalogue guide

Using this catalogue, you will notice some differences in ordering methods and mobility classes due to the breadth of our suppliers. These are outlined on each product page, however, if you have any questions, please contact our friendly Customer Services team.

Tel: +44 (0) 870 240 4133

Email: customerservices@steepergroup.com

Waterproof Products

The blue water symbol indicates that a product or component is waterproof, has water resistant fasteners and is suitable for occasional submersion in water. Please observe any product-specific caveats. Always rinse immediately with fresh water and dry following exposure to salt water or chlorinated water.

Water Resistant Products

The orange water symbol indicates that a product or component is water resistant with water resistant fasteners, making them suitable for use when there is the possibility of occasional contact with water. These are not always suitable for full submersion. Please observe any product-specific caveats. Always rinse immediately with fresh water and dry following exposure to salt water or chlorinated water.

Feet

Sidekicks are the first prosthetic feet designed specifically for use with foreshortened prostheses. Stride Control™ adjustment and replaceable bumpers allow dorsiflexion and plantarflexion in real-world environments, offering the ultimate in balance and stability for those with bilateral transfemoral amputation.

Sidekicks mimic anatomical ankle motion, allowing movement to occur naturally whilst reducing socket interface forces and eliminating unwanted torque. They're also gait-matched and approved for use in wet conditions.

CES CPI F12: Use this code to read the Sidekicks clinical evaluation summary on the Steeper website.

Waterproof*

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Moulded tread is adhered to the foot with a molecular bond to maximise longevity
- Additional customisation possible through the use of Stride Control™ and replaceable bumpers
- Supported anatomical ankle motion and flexible platform for uneven ground compliance
- Waterproof*

Moulded tread

Mimics anatomical ankle rotation

Technical Information

The Trés foot is a cost-effective, maintenance-free option for patients with low to moderate activity levels.

By incorporating a full-length toe lever and soft components to provide inversion/eversion, this dynamic response foot helps restore function at an affordable price.

The integral sandal toe foot shell is anatomically designed for an attractive, natural appearance and is reinforced with Impact Dispersion Technology™ (IDT).

CES CP F01: Use this code to read the Trés clinical evaluation summary on the Steeper website.

Technical Information

Note: Trés® Feet are gait matched at College Park Industries before shipping, and cannot be modified.

This light-weight and compliant foot has been designed for users with low to moderate levels of impact.

This foot has a low profile, similar to the Trés and Tribute feet. It also has built-in springs for a smooth roll over and added security for users, especially on uneven surfaces. Its action is softer than the Tribute and Trés, making it ideal for those patients who need a foot that protects them from excessive socket interface forces whilst also improving stability.

This durable yet lightweight foot is packaged within a low maintenance design, complete with a removable foot shell.

CES CPI F09: Use this code to read the Celsus clinical evaluation summary on the Steeper website.

Features and Benefits

- Integrated spring system and Intelliweave® technology provides excellent multi-axial movement with a natural centre of rotation; providing ground compliance and increased stability
- Low profile
- Removable foot shell with sandal toe
- Custom gait matching with pre-installed heel wedge and fulcrum pad to allow precise levels of resistance for maximum comfort

Multi-axial response

Technical Information

The Tribute foot offers a cost-effective option that provides stable footing and dependable performance on a variety of terrain, making it ideal for low to moderate impact individuals. Precisely gait matched, the multi-axial design and full-length toe lever provide the user with improved control and stability.

The Tribute provides anatomical plantar flexion, dorsiflexion, transverse rotation, and inversion/eversion through true multi-axial movement in all three planes, allowing for ease of movement, excellent ground compliance, and comfort.

Stride Control™ allows optional customisation of the plantar flexion/dorsiflexion characteristics with a simple adjustment of the posterior bumper.

CES CPI F02: Use this code to read the Tribute clinical evaluation summary on the Steeper website.

Features and Benefits

- Tri-axial technology to adapt to uneven terrain
- Full range of motion whilst maintaining ground contact
- Adjustable Stride Control™
- Removable foot shell
- Easy assembly and disassembly with one pin

The intuitive Trustep foot is designed to provide a combination of the vertical motion, rotation and stability associated with the anatomical foot. Throughout the gait cycle, the bumpers compress to bring the toe and heel down at the appropriate times, allowing the foot to maintain ground contact for firm footing.

The unique split-keel design that defines the Trustep provides up to 15mm of independent toe dorsiflexion during normal use. With a full range of options available, Trustep's versatile design allows for complete customisation, resulting in a natural gait pattern and unsurpassed comfort.

CES CPI F03: Use this code to read the Trustep clinical evaluation summary on the Steeper website.

Features and Benefits

- Tri-axial technology to adapt to uneven terrain
- Bumpers compress the toe and heel at appropriate times whilst providing cushioning and impact absorption
- Customisable bumpers for optimal control
- Anatomically designed foot shell with Spectra reinforcement
- Trustep patented Sealing Boot interlocks with the foot shell, keeping debris away from the foot

- 1 x NTS-MH-2224/2526/or 2731 (Trustep Moulded Heel Bone)

Exo Pyramid Tool Kit	Description
NTS-EXPK-30	Exo Pyramid Tool Kit, 30mm

Hardware	Description
NCP-AP-L	Axial Pin, Long, 22-31cm
NCP-APS	Axial Pin Screw
NTS-MAX-MH	Max Insert, Moulded Heel
NTS-MIN-MH	Min Insert, Moulded Heel
NTS-IS-MH	Max/Min Insert Screw, Moulded Heel
NTS-S10-25	Exo Mounting Bolt, M10 x 25mm
NTS-RBK	Pyramid Tool Retaining Bolt Kit (4pc), M6 x 12mm

The Venture foot has a full-length toe lever for a more dynamic response for active users.

Its two-stage response enables the dorsiflexion bumper to compress providing comfort during walking; this compression is controlled to engage the composite keel which improves the foot's response to high-impact activities. The heel bumper can be fine-tuned to achieve the ideal heel strike compression.

Designed for a demanding lifestyle, whether being used in the gym or the office, the precise engineering of the Venture generates a dynamic performance without sacrificing comfort.

Features and Benefits

- Tri-axial technology easily adapts to any terrain
- Energy storing to reduce fatigue
- Adjustable Stride Control™ - using 4mm hex key to customise the user's gait timing, even with the foot shell on
- Smooth transition from high to low activities

Cosmetics

Note: Please see the following page for Venture spare parts ordering information.

Ordering Information

Trial Period - This foot has a 30 day trial period.

Impact Level Descriptions

Low: Daily activities include mostly level ground walking, moving around the home and the community.

Moderate: Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

High: Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

The Odyssey K2 enables the user to walk comfortably and negotiate everyday obstacles such as stairs, curbs and uneven surfaces.

A unique, curved hydraulic cylinder allows independent adjustment of plantar flexion and dorsiflexion via easily accessible dual Stride Control™ dials. The hydraulic ankle, which works in tandem with the Intelliweave® keel, improves the user's posture, knee stability, and comfort, especially when negotiating slopes.

CES CPI F14: Use this code to read the Odyssey K2 clinical evaluation summary on the Steeper website.

Features and Benefits

- Low profile hydraulic foot/ankle combination
- Hydraulic ankle increases ground contact throughout stance, enhancing knee stability while acting to reduce socket interface forces
- Intelliweave® composite foot base provides controlled energy return and a flexible heel
- 12° of smooth hydraulic motion
- Easily accessible, independently adjustable hydraulic valves for tuning in clinic

One pivot angle

Customisable Stride Control®

Technical Information

The Odyssey K3 utilises the patented curved hydraulic ankle as well as a higher frequency carbon fibre foot base for increased dynamic response. The angular positioning and robust ankle housing are specifically designed to support moderate activity users who change terrain and speed regularly.

The combination of smooth hydraulics and a dynamic foot base increases ground contact, which reduces socket interface pressures and enhances knee stability. The Odyssey K3 performs exceptionally in a wide range of activities, including city walking and multi-terrain hiking.

Features and Benefits

- Low-profile, curved hydraulic ankle
- Robust ankle housing combined with a carbon composite keel and angular positioning designed for moderate impact users
- Easily accessible, independently adjustable hydraulic valves for tuning in clinic
- 12° of smooth hydraulic motion (3° dorsiflexion, 9° plantarflexion)

One pivot angle

Customisable Stride Control®

Technical Information

Delivering a lower profile than the Soleus, the upgraded Velocity features coupled toe springs that work together to provide a similarly progressive and smooth roll-over.

Velocity is a high-performance, low maintenance foot that is simple to align and set up. The additional inserts provided allow fine tuning of the foot function.

CES CPI F10: Use this code to read the Velocity clinical evaluation summary on the Steeper website.

Features and Benefits

- Low-profile Integrated Spring Technology (IST)
- Multi-axial function
- Intelliweave® composite to bring maximum strength and flexibility
- Easily adjustable tuning with three different heel wedges and a toe wedge provided

Technical Information

The Terrain foot was created to achieve anatomical ankle motion and energy return in a low-profile design. College Park use their tri-axial technology expertise in a new way. Versatile and service-free, the Terrain features a carbon fibre base and permanent bumpers inside the ankle housing for a progressive, comfortable response during low to high impact activities.

Waterproof* (fresh water only)

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Tri-axial motion, a unique method achieving full movement on all three planes
- A more neutral feel due to its anatomical ankle position and pivot point
- Supported anatomical ankle motion and flexible platform for uneven ground compliance and a balanced energy return
- Maintenance free
- Waterproof* (fresh water only)

The Orbit foot was designed to provide smooth rotation and rollover. College Park's unique, built-in torsion feature offers a total rotation range of 40° within an incredibly low profile. The Orbit incorporates College Park's composite expertise in a carbon fibre design to provide efficient energy return, which can improve comfort during sports, including golf or tennis.

Waterproof* (fresh water only)

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Adjustable torsion with integrated adapter giving a total rotation range of +/- 20°
- Effective energy return
- Low profile design
- Strong carbon fibre base provides a dynamic response during low to high impact activities
- Waterproof* (fresh water only)

Smooth roll over

Designed for superior comfort and rotation for all types of activities. The Voyager allows users to experience a more natural feel with its vertical shock absorption, built-in torsion adapter and responsive springs. Constructed with carbon fibre and College Park's Intelliweave® composites, the Voyager provides a comfortable and natural walking style.

Waterproof* (fresh water only)

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Integrated torsion adapter gives +/- 20° of rotation
- Vertical shock absorption allows for 10mm of movement, reducing impact and socket pressures
- High level of energy return
- Waterproof* (fresh water only)
- Up to 150kg patient weight limit**

The Soleus foot integrates multiple composite springs through a tough, flexible plantar ligament. This unique design works consistently across a variety of activity levels. Multiple springs work together to maximise range of motion and balance shock absorption with very efficient energy return and superior compliance.

CES CPI F06: Use this code to read the Soleus clinical evaluation summary on the Steeper website.

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Efficient energy return
- Waterproof design
- Integrated Spring Technology (IST)
- Polycentric ankle motion
- Vertical shock absorption
- Multi-axial compliance

Alternate housing options available: Gold, Silver, Perfect Pink, Midnight Black.

The Accent IP allows users to adjust the heel height up to 5cm with a simple push of a button, giving them complete control over their footwear choices in a low-maintenance package.

A cosmetically appealing foot, the Accent IP is provided with a contoured, soft ankle fairing that locks into the shell and prevents cosmetic buckling when the foot is adjusted at various heights.

This version includes an integrated pyramid for a quick and easy connection to standard 30mm pylon pyramid systems. The Accent's balance of dynamic response and compliance make it a great choice for a vast array of low to moderate intensity activities.

CES CPI F04: Use this code to read the Accent IP clinical evaluation summary on the Steeper website.

Features and Benefits

- User adjustable heel height with up to 5cm range and 13 increments of adjustment
- Easy to operate height adjustment button located in the ankle, available in a choice of 2 locations - medial or lateral
- Ankle fairing provides superior cosmetic finishing
- Suitable for a range of shoe styles

Accommodates various heel heights

Heel height adjustment button Available on Medial or Lateral Side

Cosmetics

The Accent IP's bonded sandal toe foot shell is reinforced with Impact Dispersion Technology™. The Ankle Fairing interlocks with the foot shell and conforms to both Endo and dynamic pylons. The foot shell and ankle fairing are anatomically designed for use with a skin to produce a natural finish.

Technical Information

To order contact customerservices@steepergroup.com

This foot, like the Accent IP, allows users to adjust the heel height up to 5cm with a simple push of a button, giving them complete control over their footwear choices in a low-maintenance package.

A cosmetically appealing foot, the Accent DP is provided with a contoured, soft ankle fairing that locks into the shell and prevents cosmetic buckling when the foot is adjusted at various heights.

This version uses an integrated dynamic pylon to provide a dynamic response, making it a great choice for a vast array of low to moderate intensity activities.

CES CPI F05: Use this code to read the Accent DP clinical evaluation summary on the Steeper website.

Features and Benefits

- Integrated dynamic pylon
- User adjustable heel height up to 5cm range
- Easy to operate height adjustment button
- Ankle fairing provides superior cosmetic finishing
- Suitable for a range of shoe styles

Accommodates various heel heights

Freedom Pacifica LP®

The Pacifica LP offers proven performance in an ultra-low profile design, which requires less than 50mm of clearance for most commonly used sizes. The split-keel design provides stability-enhancing inversion and eversion as well as being lightweight and durable.

***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Ultra low build height
- Integral male pyramid
- Split keel design
- Foot lies within the foot shell to improve cosmetic finishing
- Available in 9 stiffness categories

Cosmetics

Freedom Highlander®

Engineered for active amputees who require a lower build height foot, the Highlander foot provides a smooth gait and excellent energy return. The split-keel provides stability on uneven terrain by enhancing inversion and eversion. Many transfemoral amputees prefer this foot because of its ideal balance of stability and dynamic response.

Water-resistant*

*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

The Agilix™ is a multi-axial, shock-absorbing flexible foot system designed to manage loading impacts, reduce socket shear forces and improve comfort while walking on uneven terrain. The ultra-lightweight design offers K3 ambulators comfortable performance.

Water-resistant*

*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Vertical shock absorption and carbon fibre flexibility optimised for low to moderate impact K3 ambulators; reduces socket shear forces and improves overall comfort
- Split keel design for increased durability
- Multi-axial function increases ground compliance and stability
- Full-length dynamic heel attached at the toe ensures a seamless roll-over, for superior comfort and a more symmetrical gait
- The low profile and lightweight design of the Agilix allows users to do more and feel less tired at the end of the day

Freedom Sierra®

Ideal for active users, the Sierra foot ensures a smoother gait without the energy loss typically associated with other shock absorbing systems. Its unique angle-top design increases the length of the carbon fibre spring, which maximises energy return and flexibility. The split-keel provides excellent inversion/eversion, allowing amputees to walk with confidence on uneven terrain.

CES FRE F02: Use this code to read the Sierra clinical evaluation summary on the Steeper website.

***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Full length heel ensures exceptionally smooth gait
- Split-keel design
- Integral male pyramid
- Available in 9 stiffness categories

Freedom DynAdapt™

Feet - PROTEOR - Freedom DynAdapt

The carbon fibre DynAdapt foot is easy to fit and cover with a cosmesis thanks to its slim profile and anatomical design. The full-length split keel provides a smooth, uninterrupted roll-over from heel-strike to toe-off, as well as the medial/lateral compliance needed for good stability on uneven terrain. The advanced composite laminate delivers a high cycle fatigue in a design that also gives a high energy return.

CES FRE F07: Use this code to read the DynAdapt clinical evaluation summary on the Steeper website.

***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Slim profile, carbon fibre foot system with a slender, anatomical design
- Multi-axial function for maximum comfort
- Full length split keel gives an uninterrupted roll-over with good compliance and a dynamic response through to toe-off
- EnduraCore Technology delivers up to 3 times the fatigue life of a standard laminate
- Available in 9 stiffness categories

The Freedom ShockWave™ incorporates a Spherical Shock Unit (SSU) into the classic Freedom foot design with its proprietary EnduraCore® hybrid composite technology. The SSU provides both vertical shock absorption and transverse rotation giving everyday and active K3/K4 patients a more natural and comfortable experience.

Water-resistant*

***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Spherical Shock Unit (SSU) provides ultimate vertical shock absorption at heel strike and also an transverse rotation of +/-15 degrees easing stress and pressure on the residual limb
- Full-length heel initiates plantar flexion at heel strike for better ground compliance and maximized energy return
- Split keel and heel delivers added motion improving stability, comfort, and confidence on various terrains
- EnduraCore® technology provides ideal strength, flexibility, durability, and high energy return for more natural motion and less fatigue during the day

Split keel and heel for increased inversion/eversion

Spherical Shock Unit (SSU)

The Kinterra Foot/Ankle System combines hydraulics and carbon fibre technology to provide low to moderate impact K3 ambulators a much better walking gait, even when negotiating slopes and undulating terrain.

The hydraulic ankle has 2° of dorsiflexion against a sprung bumper and 10° of planterflexion and subsequent dorsiflexion. The rate of yield of these can be adjusted individually to achieve the most effective and comfortable gait for the user when descending a slope and the carbon fibre keel provides a smoother transition when ascending a slope.

The Dorsi-Assist spring improves ground clearance and makes the transition from a downhill ramp to level ground, with a reduced risk of catching the toe. This device works well when used with microprocessor knees.

CES FRE F05: Use this code to read the Kinterra clinical evaluation summary on the Steeper website.

Water-resistant*

*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Articulating ankle delivers reduced socket pressures for healthier residual limbs
- Increased ground contact and a more symmetrical gait
- Improved stability and safety, especially on slopes and varied terrain
- Dorsi-Assist spring aids ground clearance in swing phase
- Individual adjustment of dorsi and plantar flexion

The Kinnex 2.0 uses cutting-edge microprocessor technology to provide superior ground compliance for low to moderate impact ambulators (K3) for everyday activities. The new hydraulic system has been optimised with improved seal technology and a robust cylinder design. The Kinnex 2.0 delivers reliable energy storage and return throughout the day, thanks to its increased durability.

Waterproof*

*Waterproof note: The Kinnex should not be immersed in salt water or chlorinated water - if exposed to salt water or chlorinated water, immediately rinse with fresh water and dry.

Features and Benefits

- Sensor-controlled ankle movement reads and processes data at a rate of 200 times per second, and Rapid Response™ valve technology responds at a rate of 5 milliseconds
- The carbon fibre split heel and keel design provides optimal support and range of motion to reduce internal socket pressure, helping to accommodate obstacles and uneven terrain
- Clinicians can use the GaitLab app to lock the ankle in a neutral position for alignment and calibration, customise the setup of the device, and monitor outcomes using the GaitLab app
- New hydraulic oil reservoir and seal technology for increased oil capacity and longevity
- IP67 rated - up to 30 minutes in 1 metre of fresh water
- Dynamic lock provides a firm foundation, and can be engaged/disengaged using the app or via the button panel on the front
- Apparel Assist Mode locks the foot at an angle, making it easier for the user to change clothes or footwear
- When the charge is below 20%, users will be alerted by a soft vibration and low profile light on the button panel
- Up to 2" of heel height adjustment allows users to program up to 100 shoe styles
- 20° plantar flexion and 10° dorsiflexion range of motion means the foot is ideally positioned with the ground
- User App allows the user to make limited fine resistance adjustments

Seattle SACH

The Seattle SACH foot is suitable for new amputees who are likely to ambulate with low to medium-low impact levels (K1). It comes fully assembled with an M10 pyramid and foot bolt as well as with a Lightfoot cosmesis in two colour options.

Features and Benefits

- Easy roll-over
- Lightweight
- Natural looking Lightfoot cosmesis
- Sandal toe
- Available in both light and dark foot cosmeses

Water-resistant*

*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Seattle Natural keel view

The Zumo foot is designed to withstand 205kg, making it ideal for heavier users.

The split composite keel provides increased dynamic response, stability and improved medial/lateral compliance. The removable sandal toe foot shell, which comes in two colours, offers a high quality, natural cosmesis.

Features and Benefits

- Heavy-duty foot withstands up to 205kg of weight
- Durable composite design for low to moderate users
- Pre-assembled with a male pyramid for quick and easy installation
- Split composite keel for increased stability
- Dynamic toe and cushioned heel response
- Removable, lifelike, sandal toe foot shell available in light or dark
- Safe for occasional contact with water, but not intentional, frequent contact or submersion. After contact with salt or chlorinated water, the foot should be rinsed/cleaned

Seattle Lightfoot with Pyramid

The Seattle Lightfoot comes pre-assembled with a removable pyramid and spacer which is ready to install. This natural looking foot has a low profile build height option and four keel strengths, making it suitable for a wide range of applications.

The Seattle Lightfoot is an ideal foot for a user with a Symes amputation when the pyramid and spacer are removed, and the low profile build height option is selected.

Water-resistant*

*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Low profile selectable keel
- Ideal for the longer residuum
- Appropriate for low, medium and high activity levels
- Natural appearance
- Sandal toe
- Available in both light and dark foot shells

Cosmetics

Light/dark Sandal toe foot shell

Category Selection

To optimise the selection and ensure amputee's safety, follow the steps below to determine the appropriate keel.

1. Locate the column that corresponds with the amputee's impact level.
2. Within the selected column, locate the amputee's weight.
3. Place the relevant H number into the part number for ordering.

Note: If the amputee has a long BK, carries heavy loads or will reach a higher impact level within a year, choose the next category higher.

Category Selection		
Cat.	Foot Size (cm)	Low to Medium
		Weight
H9	24-39	114-136kg
H8	23-29	91-113kg
H7	22-29	69-90kg
H6	22-28	46-68kg
H5	22-27	<45kg

Build Height and Heel Rise			
Part Number	Size (cm)	Build Height (cm)	Heel Rise (mm)
NSLF195	22-30	9	9.5
NSLF198	22-30	9	9.5

Seattle Energy

The full-length, split composite keel in the Seattle Energy provides increased dynamic response to the user, improved medial/lateral compliance, additional stability and a cushioned heel.

The Seattle Energy foot is an ideal foot for active users with a Symes amputation when the pyramid and spacer are removed.

Features and Benefits

- Dynamic toe and cushioned heel response
- Full length, split composite keel for increased stability
- Removable, lifelike, sandal toe foot shell
- Pre-assembled with male pyramid for easy installation
- Pyramid and spacer can be removed for Symes patient applications
- Available in both Light and Dark foot shells
- Safe for occasional contact with water, but not intentional, frequent contact or submersion. After contact with salt or chlorinated water, the foot should be rinsed/cleaned

Seattle Kinetic Light

The Kinetic Light foot has a slightly higher build height than the standard Kinetic and includes a standard, easy-to-access male pyramid adapter. This foot also has a full-length, flexible keel.

Aimed at the moderate K2 activity user, this multi-axial foot can be set up with different ankle bumpers to suit the user's individual requirements, allowing for a soft heel strike, rapid progression to foot-flat and controlled progression to toe-off.

This makes it ideal for both transfemoral and transibial applications, as well as a weight range of 60kg to 160kg.

CES SEA F03: Use this code to read the Kinetic range clinical evaluation summary on the Steeper website.

***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Multi-axial ankle within the foot shell
- Five exchangeable bumper options through the foot shell using the Kinetic tooling kit
- Excellent foot inversion/eversion and plantar flexion
- Full-length flexible keel
- Integral sandal toe cosmesis in two colour options
- Integral male pyramid
- 160kg weight limit

Cosmetics

Feet - Trulife - Seattle Kinetic Light

Category Selection Chart:

Bumpers are coded according to Shore Durometer and based on foot size and patient weight. To optimise selection, follow the steps below to determine the appropriate category.

1. Locate the column associated with the amputee's foot size.
2. Locate the row corresponding to the amputee's weight.
3. The area where the column and row intersect lists the appropriate category.

Note: If the amputee has a long BK or carries heavy loads choose the next category higher.

Patient Weight	Foot Size									
	22	23	24	25	26	27	28	29	30

Weight Limit	Impact Level	Weight of Unit	Sizes (cm)	Build Height (cm)	Warranty
160kg	L M H	481g Size 25cm	22-30	7.3 Size 25cm	2 years Foot shell - 1 year

Seattle Kinetic Edge

The Kinetic Edge has a lively keel and is ideal for patients on the edge of advancing to a K3 product. This low profile composite keel foot incorporates a conventional male pyramid adapter and has a removable foot shell.

This multi-axial foot, designed for moderate K2 activity users, can be set up with different ankle bumpers to suit user's individual requirements, allowing for a soft heel strike, rapid progression to foot-flat and controlled progression to toe-off.

Ideal for both transfemoral and transibial applications, as well as a wide weight range of under 60kg to 160kg.

CES SEA F03: Use this code to read the Kinetic range clinical evaluation summary on the Steeper website.

Water-resistant*

*Water-resistant: Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- All the benefits of the Kinetic Light with the addition of a removable, sandal toe foot shell and a more lively keel
- Low profile composite keel with multi-axial ankle
- Ideal for patients on the edge of advancing to a K3 product
- Male pyramid attachment
- 160kg weight limit

Cosmetics

Light/dark sandal toe footshell

The Solas foot unifies the benefits of the S-shaped carbon fibre systems from Trulife, the Solas provides shock absorption, torsional rotation and controlled but fast plantar flexion, making it ideal for medium to high activity users and particularly good for use on transfemoral prostheses.

The energy stored allows a smooth transition to foot-flat, which is stable thanks to the split keel, and with a good dynamic response, the transition through to toe-off is equally as smooth. It is also surprisingly light for a foot with such a wide range of capabilities.

Features and Benefits

- Smooth rollover and controlled plantar flexion
- Dynamic full length composite keel, split for compliance and stability on uneven surfaces
- Dynamic response
- Optional toe wedges are provided to increase dorsiflexion resistance and mid-stance stability
- Flexible shank provides axial rotation and multiaxial articulation

Cosmetics

Light/dark Sandal Toe Foot shell

Category Selection

To optimise the selection and ensure amputee's safety, follow the steps below to determine the appropriate keel.

1. Locate the column that corresponds with the amputee's impact level.
2. Within the selected column, locate the amputee's weight.
3. Select the relevant foot length.
4. Place the relevant number into the part number for ordering.

Note: If the amputee has a long BK, carries heavy loads or will reach a higher impact level within a year, choose the next category higher.

Category Selection				
Cat.	Foot length (cm)	Low	Medium	High
4	26-30	137-160kg	124-145kg	106-125kg
3	24-30	101-136kg	89-123kg	76-105kg
2	23-29	81-100kg	71-88kg	61-75kg
1	22-28	<80kg	<70kg	<60kg

With its excellent energy return and +/- 17 degrees of Inversion and Eversion, the new Xtend Foot features characteristics comparable to a human foot. Constructed from tough glass fibre, carbon fibre and titanium this foot is ideal for all moderate-high activities including hiking, boating and golfing.

This foot provides a comfortable, natural walking style, even in challenging terrains like downward slopes and stairs. Suitable for users with above or below knee amputation and accommodates patients up to 150kg.

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Adapts to uneven surfaces through its lightweight, flexible structure
- +/- 17° of inversion and eversion
- Enables a more natural gait on slopes and inclines
- Strong and effective energy return in every step
- 150kg weight limit
- 3 year warranty (foot shell - 6 months)
- 30 day trial period

Waterproof*

Trial Period - This foot has a 30 day trial period.

Impact Level Descriptions

Low: Daily activities include mostly level ground walking, moving around in the home and the community.

Moderate: Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

Weight Limit (kg)	Foot Size (cm)						
	23	24	25	26	27	28	29
60 kg	NH100-323	NH100-324	-	-	-	-	-
80 kg	NH100-423	NH100-424	NH100-425	NH100-426	NH100-427	NH100-428	NH100-429
100 kg	NH100-523	NH100-524	NH100-525	NH100-526	NH100-527	NH100-528	NH100-529
125 kg	-	-	NH100-625	NH100-626	NH100-627	NH100-628	NH100-629
150 kg	-	-	-	NH100-726	NH100-727	NH100-728	NH100-729

How to Order:

For left or right, add L or R after the article code. Example: **NH100-426L**

For Caucasian or Brown foot-shell, add FC or FB as a suffix. Example: **NH100-426L-FB**

All foot orders include Spectra Sock and footshell

Replacement Foot Shells

For replacement foot-shells, replace NH100 prefix with NX900. Example: **NX900-426L-FB**

To order please contact our Customer Service Team.

Knees

The Freedom QUATTRO Microprocessor Knee by PROTEOR is designed to allow users to live their lives with no boundaries. The latest innovation in MPK's, PROTEOR have introduced Hyper Active Real Time (H.A.R.T.) Control Technology which allows for fast and continual adjustments to the control valve diameter, resulting in an extremely responsive custom gait experience.

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Patented Hyper Active Real Time (H.A.R.T.) Control Technology provides a unique personal experience that tracks users' individual gait patterns.
- An intuitive stance lock is active within a range from 0-70°, offering additional security, comfort and control
- Advanced stumble recovery which determines the appropriate resistance to recover from a stumble more naturally
- The power-off flexion resistance can be manually adjusted to accommodate different user preferences and weights
- Prosthetists will find set up simple using the Gait Lab app to set user parameters and modes. The app also allows for remote data capture and outcome measure reporting giving clinicians an in-depth look of the users QUATTRO journey
- The Freedom Innovations app allows users to adjust and customise 20 modes to suit their lifestyle
- Independent adjustable flexion and extension resistances and ROM/locking making sure the user has full control at all times
- Functionality is integrated into the on-board keypad allowing users to check battery status, manually switch activity modes or set and release flexion lock.
- IP67 rating allows users to fully submerge under 1 meter of water for up to 30 minutes
- QUATTRO allows for seamless transitioning between activities
- Lowest MPK build height for added versatility in foot selection
- Field replaceable knee pad cover allowing for rapid replacement and uninterrupted use

Maximum Patient Weight	136kg
Activity Level	K2 - K4
Warranty	NHS/Veterans - 5 Years Private - 6 Years

Servicing

Minimal servicing is required for QUATTRO, with no servicing needed until 36 months, a further service is required at 54 months for those with a 6 year warranty. The extended manufacturers warranty includes service and maintenance inspections as well as a loaner unit while this is underway.

For further warranty and servicing information please contact customer services.

Clinical & User Apps

Dedicated User & Clinical Apps, used for set-up, configure and data reporting, available to download now.

GAITLAB

Freedom Innovations

To establish a more natural experience of mobility, the Freedom Innovations team at PROTEOR examined biological norms and developed the Plié 3 knee with a microprocessor controlled swing and stance.

The Plié 3 is the most responsive MPC knee ever developed, thanks to its combination of high-performance processing capabilities and a cutting-edge hydraulic system.

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Standard Black Designer Fairing

Features and Benefits

- Independent adjustment of flexion, extension and stance yield
- Sampling at 1000 Hz with a spool valve response time of 10 milliseconds, the Plié 3 responds 10 to 20 times more rapidly than other MPC knees
- Unique design controls both stance and swing phases, and the transition between them
- Rapid gait response through the combination of the hydraulic control and the microprocessor control logic, allowing the knee to react much faster than other MPC knees
- Advanced, customisable stumble recovery
- Cadence report to assist with outcome measures
- Selection of 10 designer fairings
- Transferable settings - save and reinstall settings into another unit e.g. when refitting after servicing
- Water and particle-proof to IP67*

Plié 3 Packages

- Plié 3 package includes a 5 year warranty, choice of one foot (Kinterra, Sierra, Highlander, Agilix, Pacifica LP or DynAdapt), a set of adapters and a preferred designer fairing.

Designer Fairings

Clinical Application

The Plié 3 is suitable for any K3 transfemoral prosthesis user who has adequate hip flexion and extension strength, is capable of walking a limb with a free knee, and would benefit from a unit that provides:

- A high degree of safety, by means of a stumble recovery system
- A customisable recovery system that will maintain safety over a range of activities
- The opportunity to walk at variable cadence over surfaces such as sand, pebbles and through grass
- Protection from dust, silt, powder and moisture, either in the work place or when pursuing a leisure activity
- Continuous function even when occasionally totally submersed
- The ability to walk backwards, or traverse sideways
- For high K3 or K4 users, the opportunity to jog, or participate in a sport where change of pace or direction is required

Please see the order form overleaf for further information on impact levels for compatible feet.

Ordering Information

Trial Period - this knee has a 30 day trial period.

Plié 3 Package - Order Form

Included in the package:

- Plié 3 knee, including 5 year warranty & the following accessories:
 - Wireless USB adapter
 - Lithium-ion battery case
 - Lithium-ion battery x2
 - Battery charger
 - Air pump with hose adapter
 - Smooth hose adapter for air pump
- Preferred designer fairing
- 1x Freedom foot - Kinterra, Sierra, Highlander, Agilix, Pacifica LP or DynAdapt
- Set of adapters

How to order a Plié trial kit

Step 1	Step 2	Step 3	Step 4 - Successful Trial Only
Submit a completed order form to customerservices@steepergroup.com .	When the PO and patient form has been received, this will generate an order for a 30 day trial period for the KIT-PLIEMPK. You will not be charged or invoiced at this stage.	Following a successful trial, call Customer Services on 0870 240 4133 to obtain an RTA number and return the demo Plié 3 knee only. If the trial was unsuccessful, call Customer Services on 0870 240 4133 to obtain an RTA number and return the full kit.	After contacting Customer Services your order will then be finalised. The definitive Plié 3 knee and the preferred designer fairing stated on this form will be delivered and invoiced.

N.B. If you do not require a trial and would like to place a definitive order, please submit this form, a purchase order using the part number KIT-PLIEMPK, and tick this box:

If only a foot is required:
If only a knee is required:

Impact Level Descriptions

Low: Daily activities include mostly ground-level walking, moving around in the home and the community.

Moderate: Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

High: Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

Plié 3 Warranty

5 years

The extended warranty on the Plié 3 from 3 to 5 years is automatically included within the MPK package. Please note, the Plié 3 knee must be returned for annual servicing to maintain the warranty. A loaner unit will be provided during this time.

For warranty terms on all other items, please refer to the Extended Warranty - KIT-PLIEMPK information.

Overview of Knees

Knee Joints				
Group	Name	Performance of the swing phase of gait	Maximum body weight	Mobility class
Mechanical	NOFM0	Approx. 1km/h	125kg	1
	NOFM2	Approx. 2km/h	125kg	1, 2
	NOFM1 / KFM1	Approx. 3km/h	136kg	1, 2
Pneumatic	NOP2	Approx. 4km/h	125kg	2, (3)
	NOP4	Approx. 4km/h	100kg	2, (3)
	NOP5 / NKP5	Approx. 4km/h	125kg	2, (3)
	NOHP3	Approx. 4km/h	125kg	(2), 3
	NOPASO/NKPASO	Auto adaptive - 2-7km/h*	136kg	(2) 3, 4

*If the patient is capable of achieving above 7km/h, the knee is capable of allowing them to do so, but it is the responsibility of the prosthetist to ensure that the patient is safe to do so.

Part Number Descriptions

The names of the Össur knee joints are explained as follows:
Steeper add an N prefix to the Össur number, to create a product code unique to them.

The second letter describes the amputation level, e.g.:	The third letter describes the function, e.g.:	The number for the version number, e.g.:
NOP4 = Transfemoral (pyramid adapter)	NOFM1 = Mechanical and locking	NOP4 = Pneumatic above knee (O) joint version 4
	NOP4 = Pneumatic	
	NOHP3 = High-performance pneumatic	

Mobility Classes 1 to 4

1 Indoor walkers

The patient has the ability or the potential to use a prosthesis to move from place to place or to walk at a low speed on a flat surface. The walking time and walking distance are both strictly limited by their condition.

Treatment objective:
To restore the patient's ability to stand and enable them to walk around in the home.

2 Restricted outdoor walkers

The patient has the ability or the potential to walk at low speed with a prosthesis and to overcome minor obstacles such as kerbs, single steps or uneven ground.

The walking time and the walking distance are both limited by their condition.

Treatment objective:
To restore the patient's ability to stand and enable them to walk around in the home and the immediate vicinity.

3 Unrestricted outdoor walkers

The patient has the ability or the potential to use a prosthesis to walk at moderate to high and also variable speeds, and to overcome most obstacles. He/She is also able to move around on open ground and can carry out occupational, therapeutic and other activities that do not exert undue mechanical stresses on the prosthesis.

The user may have an additional need for safety due to secondary circumstances (additional handicap, special living conditions) in connection with moderate to high mobility demands. The walking time and the walking distance are both marginally limited compared with healthy individuals.

Treatment objective:
To restore the patient's ability to stand and enable them to walk around unhindered at home and, with minor restrictions only, outside.

4 Unrestricted outdoor walkers with particularly high demands

The patient has the ability or potential to use a prosthesis for walking as well as the unrestricted outside walker. In addition, high impact stresses may occur, for example, as a result of high body weight. The walking time and walking distance are both unlimited.

Treatment objective:
To restore the patient's ability to stand and enable them to walk around unhindered at home and with unlimited walking and mobility outside.

Maximum Body Weight

In addition to the mobility classes, we will also define the maximum permissible body weight in the product pages, which is based on the user's weight and bearing load.

Please note: The product with the lowest given weight class determines the maximum permissible body weight.

NOFMO is a lightweight, semi-automatic locking unit developed by Össur to meet the needs of patients who only require a semi-automatic locking unit.

The positive and audible locking mechanism will give patients confidence that, once fully extended, the knee will be secure, without the hassle of applying a toe load to offload it in order to unlock when the user wants to sit down. These features make sitting and then standing and then sitting again a lot safer while still providing complete security when walking.

CES OSS K00: Use this code to read the Monolock NOFMO clinical evaluation summary on the Steeper website.

Features and Benefits

- Lightweight and robust with a low overall build height
- Automatic lock activates in extension, with an audible click on locking
- Simple pull-up lever allows the knee to unlock easily without needing to offload, for easy transition from standing to sitting
- High flexion angle

Automatic lock activates in extension

Simple pull-up lock lever

Mobility Class and Weight Limit

Part Number	Description
NOFMO	Mechanical knee joint with lock

Technical Information

Material	Aluminium
Amputation Level	Transfemoral
Total Fitted Height (1)	Approx 100mm
Effective Module Height (2)	Approx 47mm
Fitted Height (3)	Approx 22mm
Weight	Approx 275g
Proximal Connector	Pyramid
Distal Connector	Integral 30mm tube receiver
Swing Phase	No swing phase control
Stance Phase	Locking
Axes	Monocentric
Flexion Angle without Socket	Approx 140°
Maximum Patient Weight	125kg
Mobility Class	1
Warranty	3 years

The Össur NOFM2 is a small, lightweight monocentric unit that can be used as a free knee with weight-activated stance stability, but also comes complete with a lock mechanism and thigh release, making it a very versatile unit.

In position 1, the knee will lock automatically when extended. For position 2, lifting the lever up to the first stop position unlocks the knee, then upon release, the knee will automatically lock again on extension.

CES OSS K02: Use this code to read the NOFM2 clinical evaluation summary on the Steeper website.

Features and Benefits

- Compact and lightweight
- Monocentric construction with finely adjustable stance stability brake to suit the patient's weight or to match the patient's gait
- Angular alignment adjustment
- Smooth transition into swing phase, with integrated extension spring adjustable to suit individual requirements
- Easily converted to SAKL or HOKL with positive locking action
- Unique, dual-function lock lever

Weight activated brake: The weight activated brake is adjusted in two ways: to suit the patient's weight and to match the patient's gait, allowing a smooth transition into swing phase.

Integrated extension spring: The integrated extension assist spring is adjustable to suit individual requirements.

Dual function lock lever:

Position 1: Knee locked. With the lever in this position, the knee will lock automatically when extended.

Position 2: Knee unlocked. Lifting the lever up to the first stop position will unlock the knee, then on releasing the lever the knee will automatically lock again on extension. Lifting the lever so that it clicks past the first stop position will hold the knee in an unlocked position, until the patient chooses to click it down again. It will then automatically lock on extension.

NOFM1 / NKFM1

The Össur NOFM1 is a small polycentric unit with a lock mechanism and thigh release that can be used as a free knee with geometric stance stability. The versatile NOFM1 is supplied with a male pyramid adapter to allow angular adjustment and the NKFM1 comes with a laminating adapter, complete with adjustable alignment discs, making it ideal for users with very long residual limbs.

CES OSS K01: Use this code to read the NOFM1/NKFM1 clinical evaluation summary on the Steeper website.

Features and Benefits

- Compact and lightweight
- Polycentric construction provides improved ground clearance in swing phase
- Integrated extension assist
- Easily converted to SAKL or HOKL with positive locking action
- Unlimited rotation and 5mm of shift in any direction are possible with either version, as is 10° of angular adjustment, this being achieved on the NKFM1 by means of a pair of wedge shaped rotatable discs
- Adjustable friction damping allows significant control of the swing phase, making it easy to minimise any terminal impact

Position 1: Knee locked. With the lever in this position, the knee will lock automatically when extended.

Position 2: Knee unlocked. Lifting the lever up to the first stop position will unlock the knee, then on releasing the lever the knee will automatically lock again on extension. Lifting the lever so that it clicks past the first stop position will hold the knee in an unlocked position, until the patient chooses to click it down again. It will then automatically lock on extension.

This lightweight, polycentric knee has a pneumatic cylinder that provides a smooth swing phase control. It is compact and slim, making it an ideal option for children who have outgrown paediatric knee units or adults who require a slim cosmesis. When flexed, the knee's design still allows a neat and shapely cosmesis to be produced.

Further features include adjustable geometry. This allows the knee's geometric stability to be increased or decreased, dependant upon the patient's ability. This makes it particularly suitable wherever there is a need to readily change the way the unit transitions from stance to swing phase, whilst still providing positive stance stability, such as on a hip disarticulation prosthesis.

Features and Benefits

- Pneumatic swing phase control - the independent adjustment of the flexion and extension valves, allows the swing phase to be easily set up to meet the individual needs of the user. On extension, the knee geometry automatically provides stance stability
- Adjustable stance phase geometry can be easily adjusted to provide the transition from stance to swing that most suits the user's requirements
- Polycentric joint construction provides improved ground clearance at mid swing, reducing the risk of catching the toe and stumbling
- Lightweight and robust
- Compact and slim
- High stance phase stability
- High flexion angle at 160°

Adjustable stance geometry

The Össur NOP4 is a slim and lightweight monocentric knee unit, which has a weight activated stance control mechanism, with pneumatic swing phase control.

This popular design can be easily adjusted to allow a very positive brake, while maintaining a smooth transition into swing.

Features and Benefits

- Compact and lightweight
- Monocentric construction with finely adjustable stance stability brake
- Angular alignment adjustment
- Smooth transition into a controlled adjustable swing phase
- Pneumatic swing phase with independent adjustment of flexion and extension, allowing the unit to be set up to suit a range of individual walking speeds
- High knee flexion angle of 145°

NOP5 / NKP5

The polycentric construction of the NOP5/ NKP5 provides good stance stability, thanks to its geometry, as well as a smooth pneumatically controlled swing phase, with independent flexion and extension adjustments. A male pyramid adapter is included with the NOP5 to allow for angular adjustments. The NKP5 comes with a laminating adapter and adjustable alignment discs, making it ideal for patients with very long residual limbs.

CES OSS K07: Use this code to read the NOP5/ NKP5 clinical evaluation summary on the Steeper website.

Features and Benefits

- Polycentric construction provides improved ground clearance in swing phase
- Smooth transition into a controlled adjustable swing phase
- Pneumatic swing phase with independent adjustment of flexion and extension
- Integral extension assist spring and needle roller bearings
- Adapter allows unlimited rotation and 5mm of shift in any direction with either version, as is 10° of angular adjustment (achieved on the NKP5 by means of a pair of wedge-shaped rotatable discs)
- High knee flexion angle 145° allows more freedom of movement and wearing comfort

The polycentric construction of these knees provide a high degree of geometric stance stability, by means of their long side links. A smooth pneumatically controlled swing phase automatically adapts to a wide range of walking speeds (up to 7km/h) for a simple set-up that requires no adjustment.

The NOPASO comes with a male pyramid adapter for angular adjustment, whereas the NKPASO comes with a laminating adapter with adjustable alignment discs, making it ideal for patients with very long residual limbs.

CES OSS K09: Read the NOPASO/NKPASO clinical evaluation summary on the Steeper website.

Features and Benefits

- Auto-adaptive pneumatic cylinder allows a wide range of walking speeds as the cylinder automatically and instantly responds to the user's inputs, whilst maintaining a safe stance phase
- Transition into swing phase adjustable by means of stance wedges
- Geometric design creates stance phase stability at heel strike
- Polycentric construction provides improved ground clearance in swing phase
- Adapter allows unlimited rotation and 5mm of shift in any direction with either version, as is 10° of angular adjustment

The Kinegen Wave provides users with a number of technical advantages which are necessary for optimal safety and natural movement.

The high-quality knee joint is complemented by the modern design that is seen in the well-known models of the Kinegen series. A polycentric knee joint that has a high stance phase stability due to a posteriorly positioned pivot point, suitable for K2 users. The mechanical shortening in the swing phase enables increased ground clearance whilst the manual lock provides additional safety. Users can move freely and carefree in fresh, salt or chlorinated water thanks to its water-resistant materials.

Waterproof*

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Integrated extension assist spring
- High stance phase safety due to polycentric design
- Ability to easily switch between free knee and locked knee
- 125kg weight limit
- Male pyramid & M36 Thread connection options
- Adjustable axis friction for swing phase control
- Waterproof in fresh, chlorinated and salt water*

Adjustable axle friction for swing phase control

Manual lock

Integrated channels for water drainage

The Kinegen Stream is a polycentric unit with hydraulic swing phase control and pneumatic extension assist for active users up to 150kg. It is geometrically stable in the stance phase and transitions smoothly into the well controlled swing phase with little effort required and excellent control of the final 10 ° of extension to prevent terminal impact.

The Kinegen Stream has a 'cycling' mode enabled by the user by means of a lateral push button with a bicycle symbol.

Features and Benefits

- For active patients weighing up to 150kg
- 'Cycling' mode enabled by the user by means of a lateral push button with a bicycle symbol
- High performance hydraulic unit with precise adjustment allows an optimal, individual customisation of the joint
- Individually adjustable end position damping to reduce terminal impact
- Convenient front access to easily adjustable hydraulic swing phase damper

Seattle Select Stance Flexion Knee

The Seattle Select Stance Flexion Knee is a tough polycentric unit which functions to a much higher level than might be expected from a pneumatically controlled knee. The Stance Phase Sensitivity can be adjusted by changing the instant centre of rotation (ICR), which makes the transition into swing phase more or less sensitive.

The flexion and extension resistances of the swing phase control are also independently adjustable, as is the stance flexion resistance, with additional interchangeable stance flexion springs supplied to accommodate a wide range of patient weights and activity levels.

Features and Benefits

- Polycentric geometry creates effective shortening for improved ground clearance mid-swing
- Adjustable stance flexion with 9° of movement provides shock absorption at heel strike
- Independently adjustable flexion and extension of the pneumatic swing phase control
- Adjustable Stance Phase Sensitivity by means of changing the ICR
- Integral extension assist spring
- Available with built-in proximal pyramid or threaded adapter
- Equipped with built-in knee cap, increasing safety and preventing clothing from becoming caught in the mechanism

Guardian™ Knee

The Guardian™ Knee by College Park is a lightweight mechanical knee joint, suited to low-impact users learning to stand and walk in rehabilitation. It features a friction brake for stance control and extension assist.

Designed with the clinician and user in mind, it can be easily adjusted for gait matching without having to remove the prosthesis. As the patient progresses, the remote lock feature can be disengaged, allowing the knee to operate as a single knee axis joint and providing the full 145° of anatomical motion.

Features and Benefits

- A simple lock lever is located at the centre of the knee for easy access
- Flexible remote Hand Operated (HOKL) or Semi-Automatic (SAKL) Knee Lock options to change with the user's requirements
- Standard hex key can be used to adjust the extension assist, brake friction and sensitivity, without having to remove the knee
- A small degree of stance flexion improves stability at loading response to mimic an anatomical gait pattern
- The easily adjustable weight-activated brake will disengage when the limb is offloaded sufficiently during pre-swing, at which point an extension assist is enabled

Updated remote lock location

Simple to operate remote lock kit

Victor™ Knee

The Victor™ Knee by College Park is a single-axis pneumatic knee joint, that can be adjusted to suit both slow and fast paced walking, suitable for low to moderate activity users. The knee features an adjustable weight-activated friction brake that can be adjusted to control stance phase, making it ideal for patients who want to increase their activity level post-rehabilitation.

Prosthetists can fine-tune the device according to patient preferences, and customise the pneumatic flexion and extension resistance for optimal movement.

Features and Benefits

- Economical option that enables users to feel confident
- Weight-activated friction brake and a small degree of stance flexion offers adjustable stability during stance phase
- Integrated extension assist ensures full extension with every step
- Pneumatic swing phase control accommodates gait across varying walking speeds
- Clinicians can easily adjust the knee to suit the user's preferences using a standard hex key

Easily adjusted features

Capital™ Knee

The Capital™ knee by College Park Industries is a yielding, hydraulic, single-axis knee joint that is easy to use for both patients and clinicians. This knee effortlessly accommodates the user's variable gait thanks to smooth and responsive hydraulics in both the swing and stance phases. The Capital knee is durable, sleek, and fresh water friendly, with easy mode selection and standard 4mm adjustments for quick setup/ installation. The Capital is a strong, reliable solution for moderate to high activity users.

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- The Capital knee is designed to provide the user with a secure, responsive, and natural experience during the gait cycle
- The Capital Knee accommodates varying speeds from slow to fast using hydraulic control
- Due to its yielding mechanism, the Capital knee allows for controlled flexion of the knee during downhill walking, allowing for steady, smooth steps
- This lightweight, hydraulic knee can withstand many freshwater activities. Patients can wear the Capital in the shower as the moisture will not wear on the system
- The Capital's flexion, extension, and stance flexion resistance can all be adjusted using a 4mm hex wrench - so clinicians can dial in swing flexion and extension as well as stance flexion resistance without having to remove the device

Easy mode selection

Silicone Liners

Össur Product Features

silicone gel

- High water vapour, permeability and very good climate exchange characteristics reducing perspiration and odours
- Very high dimensional stability of the silicone structure for an exceptional fit
- Constant compression gradient, even with long-term use
- Microscopically smooth surface to prevent bacterial colonisation and to allow thorough cleaning

Textile cover

- Durable, special textile cover for easy comfortable donning
- High quality, sheer, elastic Össur knit for an optimum fit
- Glides easily over the skin without a donning aid or spray

2-zone matrix

- Very high radial stretch for a step-free, gentle and comfortable transition in the matrix area
- Progressive stretch profile for very high soft-tissue grip

Flexible cup

- For simplified, shape-moulding and secure donning of the liner
- Very good damping properties for absorbing and thus reducing the resulting heel-strike impact in the socket
- No impairment of the fit or the wearing comfort because the distal end of the residual limb is ideally moulded and contained

2-zone-I matrix

- Step-free, gentle transition from the matrix area to the elastic area
- Progressive stretch profile for optimum soft-tissue grip
- Proprioception improved by internal 2-zone matrix

Flexring

- Improved fit which promotes the benefits of the flexible cup
- Neat distal edge, no fraying

Non-Stop-I-Matrix

- Very good adaptation to various residual limb shapes due to optimum radial elasticity (transverse stretch)
- Gentle to soft-tissue structures by preventing longitudinal stretch

Size marking

- Guaranteed follow-up supply
- Size and serial number coded for traceability and documentation

Easy Glide PLUS

- Proprioception improved by internal 2-zone-matrix
- Unique gliding surface coating for simple socket donning and doffing
- Simple, residue-free cleaning for the best possible hygiene
- Excellent stretch characteristics through elimination of textile cover

Umbrellan

- Umbrellan is a patented knitted fabric, combining very high elasticity with electromagnetic shielding
- Increased well-being and mobility by alleviation and/or removal of phantom pain, sensations and idiopathic residual limb pain

No Spray

- More independence thanks to Easy Glide PLUS coating
- No alcohol spray needed for turning the liner inside out or putting it on

TF-Matrix

- Adaptation to different residual thigh shapes thanks to very good radial elasticity (transverse stretch)
- Gentle to the soft-tissue structures by inhibiting longitudinal stretch
- More accurate control of the prosthesis with the residual limb due to improved proprioception

● Suitable ▲ Particularly suitable

The First liner is a clear, soft silicone interface liner that is suitable for for transtibial (below knee) amputees with good soft tissue coverage up to mobility class 2. The unique self-gliding surface on the outside of the liner allows the liner to be fitted and removed easily from the socket without the need for time consuming sprays. The liner features a two-zone matrix which reduces shear forces on the underlying soft tissue. As there is no fabric cover there is no restriction of the liner's radial elasticity.

CES OSS LO1: Use this code to read the First liner clinical evaluation summary on the Steeper website.

Features and Benefits

Residual Limb Suitability

Particularly suitable for:

Even residual limb shape, decreasing slightly distally, good soft tissue cover

Suitable for:

Residual limb bonier, rather poor soft tissue cover and/or with severe scars

More conical residual limb shape, good soft tissue cover

Size Selection

Determining the size

1. Measure the circumference of the residual limb 4cm above the distal end of the residual limb.
2. Attention: Bony structures (e.g. end of the tibia) must be included in the circumference. If the distal tibia is not located within the above measurement, measure higher than 4cm above the distal end of the residual limb.
3. The circumference minus 0-1 liner size determines the size to be ordered.

Determining the matrix

1. Measure the distance from the distal end of the residual limb to the head of the fibula.
2. Attention: The matrix must not go above the head of the fibula.

Notes on trimming

1. The matrix must not be cut.
2. The trim line for a lower leg prosthesis should lie at least 10cm above the region of the socket edge.
3. Use the Össur pinking scissors for trimming (Part No. N1950006).

The First 3 liner is a clear, soft silicone interface liner with thicker distal walls for added cushioning. It is suitable for below knee (transtibial) users who have a mobility class of 2. It features the unique self-gliding outer surface that makes it easier for socket donning and doffing, without the need for alcohol sprays or talcum powder. The liner has a 2-zone matrix which reduces shear forces on the underlying soft tissue. As there is no fabric cover there is no restriction of the liner's radial elasticity.

CES OSS LO1: Use this code to read the First liner clinical evaluation summary on the Steeper website.

Protect 3C Liner

The Protect 3C liner is a soft silicone liner that is particularly suitable for below knee (transtibial) amputees with reduced soft tissue coverage and/or poor skin condition up to mobility class 3. It contains a surgical grade oil and vitamin E which reduces adhesion, making the liner easier to apply and remove and may improve skin condition in as little as 3 days.

This liner's extra wall thickness provides excellent cushioning and comfort. The liner can be easily fitted and removed from the socket thanks to an outer textile cover that eliminates the need for time-consuming sprays.

Protect 3C Cushion Liner

The Protect 3C Cushion liner is a soft silicone liner that is particularly suitable for below knee (transtibial) amputees with reduced soft tissue coverage and/or poor skin condition up to mobility class 3. It contains a surgical grade oil and vitamin E, which reduces adhesion, making the liner easier to apply and remove and may improve skin condition in as little as 3 days.

Designed to be used in a total contact socket with expulsion valve and suction sleeve, such as the Össur Genu, a high level of suspension can be achieved. The extra wall thickness of this liner provides very good cushioning and high comfort. An outer texture cover allows the liner to be fitted and removed from the socket easily without the need for time-consuming sprays.

4 Silicone Liners

4 Silicone Liners

4Seal TFS and TFC Classic Liners

These 4Seal Liners are designed for use in a socket with a distal expulsion valve and provides excellent suspension by means of its four integral seals.

The Easy Glide surface and flexible nature of the seals make the liner simple to roll on and negates the need for any lubricant when donning the socket.

The Umbrellan fabric, which is contained within the silicone as part of the liner matrix, provides both increased durability as well as pain relief from phantom limb pain, phantom limb sensation, and idiopathic residual limb pain.

CES OSS L13: Use this code to read the 4Seal TFS and TFC Classic liners clinical evaluation summary on the Steeper website.

50 - 55	S	S	S	S	S	50
	S C	S C	S C	S C	S C	

Determining the size

- Determine the **circumferential dimension D (distal)** of the residual limb 4cm above the distal end. The circumferential dimension minus 0-1 results in the Össur liner size. **Attention:** Bony structures (such as the edge of the femur) must be included in the circumferential dimension.
- Determine the residual limb length L, from the end (minus 4cm) to the inseam height (perineum).
- Determine the **circumferential dimension P (proximal)** at the inseam height (perineum).*
- The residual limb length and circumference are the basis for selecting the correct version of the Össur liner (transfemoral, standard or conical).

*Explanation of the table: standard / conical
A standard liner (= S) applies if the proximal circumference P is below the reference value (<). A conical liner (= C) applies if the proximal circumference P is above the reference value (>).

Össur 4Seal Volume Management Sock

The Össur volume compensation stocking with integrated non-slip top band also features innovative EASY CUT technology. The stocking compensates for variations in volume and can easily be shortened to five different lengths without having to separate it, meaning no additional sewing is necessary.

4Seal TFS and TFC Senso Liners

The TFS/TFC above-knee 4Seal Senso liners ensures a secure fit between the residual limb and the prosthesis. The matrix of the 4Seal Senso is woven with a particularly soft thread, this results in a pleasantly smooth surface inside the liner for the care of very sensitive residual limb skin.

The silicone used is very stable, kind to skin and easy to clean. Due to four comfortable and flexible sealing fins, it is possible to provide a pleasant wearing comfort without constriction.

The liner can be turned inside out and applied without the need for alcohol spray, providing more flexibility and independence.

Determining the size

- Determine the **circumferential dimension D (distal)** of the residual limb 4cm above the distal end. The circumferential dimension minus 0-1 results in the Össur liner size. **Attention:** Bony structures (such as the edge of the femur) must be included in the circumferential dimension.
- Determine the residual limb length L, from the end (minus 4cm) to the inseam height (perineum).
- Determine the **circumferential dimension P (proximal)** at the inseam height (perineum).*
- The residual limb length and circumference are the basis for selecting the correct version of the Össur liner (transfemoral, standard or conical).

*Explanation of the table:
 standard /conical
 A standard liner (= S) applies if the proximal circumference P is below the reference value (<). A conical liner (= C) applies if the proximal circumference P is above the reference value (>).

Össur 4Seal Volume Management Sock

The Össur volume compensation stocking with integrated non-slip top band also features innovative EASY CUT technology. The stocking compensates for variations in volume and can easily be shortened to five different lengths without having to separate it, meaning no additional sewing is necessary.

The AKOS liners are silicone interface liners specifically designed for all mobility classes of above-knee (transfemoral) amputees. The liner has a continuous matrix with minimal axial stretch to make it comfortable to wear and provides a high transverse stretch to ensure optimal soft tissue grip. The flexible fabric ensures an optimal fit at the distal end of the residual limb as well as ease of donning. The gliding outer surface replaces the textile cover which restricts stretch, this also eliminates the need for time-consuming sprays. Orientation marks on the liner help to ensure the liner is donned in the same position each time.

CES OSS L16: Use this code to read the AKOS TFS and TFC Classic liners clinical evaluation summary on the Steeper website.

52cm	NM895552	-

Size Selection

Determining the size
 1. Measure **circumference D** (distal) of the residual limb 4cm above the distal end of the residual limb. The circumference minus 0-1 liner size determines the size to be ordered.

Attention: Bony structures (e.g. transfemoral border) must be included in the circumference. If the distal femur is not located within the above measurement, measure higher than 4cm above the distal end of the residual limb. The soft tissues must be tightly contained.

2. Measure the length of the residual limb length L from the end of the residual limb (-4cm) to the perineum.

3. Measure **circumference P** (proximal) at the perineum.*

4. The residual limb length and circumference are the basis for choosing the correct version of the Össur Liner (transfemoral, standard or conical).

Notes on trimming
 1. The matrix must not be cut.

2. The trim line for a lower leg prosthesis should lie at least 10cm above the region of the socket edge.

3. Use the Össur pinking scissors for trimming (Part No. N1950006).

* Explanation of the table: standard, conical
 If the proximal circumference P is below the standard figure (<), it is a standard liner (= S).
 If the proximal circumference P is above the standard value (>), it is a conical liner (=C).

The Relax 3C liner provides a pain-relieving effect from phantom limb pain, phantom limb sensation and idiopathic residual limb pain. This is due to the metallurgical knitted fabric (Umbrellan) in the cover and liner matrix screening against electromagnetic influences.

Electromagnetic shielding: As evidenced in Fisher K, Oliver S, Sedki I, Hanspal R. The effect of electromagnetic shielding on phantom limb pain: A placebo-controlled double-blind crossover trial. Prosthetics and Orthotics International. 2015.

Features and Benefits

Residual Limb Suitability

Particularly suitable for:

Even residual limb shape, decreasing slightly distally, good soft tissue cover

More conical residual limb shape, good soft tissue cover

Suitable for:

Residual limb bonier, rather poor soft tissue cover and/or with severe scars

The SoftSkin standard silicone liner range by Uniprox, offers a selection of shore hardnesses with an optional pin connection, or with a smooth distal contour. The liners include a matrix to reduce pistoning whilst the design of the outer knitted fabric allows the socket to be donned more easily.

Features and Benefits

- Improved grip contact
- Unique outer textile allows for easier socket donning
- Decreased skin irritation
- Machine-washable (30°C)
- Available in three shore hardnesses: from the softer NS30 for more sensitive residual limbs, through to the stiffer NS50 liners suitable for higher activity
- The smooth contour (cushion) liners are particularly suitable for bony residual limbs, through-knee amputations and above knee residua with deep scars

Ordering Information

All liners are 3mm thick, 370mm long.

Note: The circumference is measured 4cm above the distal end of the residual limb

4 Silicone Liners

4 Silicone Liners

The SoftSkinAir® is a unique, breathable silicone liner featuring a distinctive structure and special micropores to reduce the build up of sweat and draw moisture away from the residual limb; providing a unique solution to patients who previously have been unable to wear a liner due to high sweat levels. It has proven effectiveness in wearing tests and moisture level analyses.

Available in multiple shore hardnesses, with an optional pin connection, or with a smooth distal contour.

The SoftSkinAir® Sport liner offers an additional distal matrix to further improve the reduction of longitudinal movements.

Features and Benefits

- Wicks sweat via micropores
- Unique functional and progressive outside texture
- Available with or without distal connector
- Machine-washable (30°C)
- Breathable and comfortable solution
- Improved grip contact
- Unique outer textile allows for easier socket donning
- Decreased skin irritation
- Reduced temperature inside the liner
- Available in three shore hardnesses: from the softer NS30 for more sensitive residual limbs, through to the durable NS50 liners suitable for higher activities

Air Sport

Additional Features and Benefits

- Excellent wicking of sweat through micropores
- Shore hardness: 40 Shore A (soft)
- Additional distal matrix for more stability
- Sizes: 20 - 30
- Dual layer with silky inner surface
- Reduction of elongation

Ordering Information

All liners are 3mm thick, 370mm long.

Note: The circumference is measured 4cm above the distal end of the residual limb

The SoftSkin 2L and SoftSkinAir® 2L are dual layer liners featuring a soft silicone inner for gentle skin contact, with a firmer silicone outer to provide stability.

The SoftSkinAir® 2L offers the additional benefit of sweat wicking micropores to reduce moisture, resulting in drier skin and lower temperature within the liner for residual limb comfort and reduced skin irritation.

Features and Benefits

- Soft on the inside, stable on the outside (Shore hardness 30/50)
- Soft residual limb padding
- Innovative functional knitted fabric to reduce the longitudinal movement without an internal matrix
- Sizes: 16 - 45
- Unique functional outer fabric
- Machine-washable (30°C)
- Improved grip contact
- Decreased skin irritation

SoftSkinAir® 2L

Additional Features and Benefits

- Breathable and comfortable solution
- Wicks sweat via micropores

The SoftSkin TF and SoftSkinAir® TF silicone liners offer the benefits of the Softskin range to a wider range of transfemoral users thanks to their increased size range.

With a shore hardness of 40, these liners allow long lasting comfort to the user with high transverse elasticity to adapt to residuum shape.

The TF Air offers the additional benefit of sweat-wicking micropores to reduce moisture, resulting in drier skin and lower temperature within the liner for residual limb comfort and skin irritation reduction.

Features and Benefits

- Soft residual limb padding
- Perfect sweat evacuation through micropores
- Innovative functional knitted fabric to reduce the longitudinal movement without an internal matrix
- Sizes: 28 - 55
- Unique functional outer fabric
- Machine-washable (30°C)
- Improved grip contact
- Decreased skin irritation

Gel Liners

The College Park Genesee liner offers all the benefits of a gel liner in an affordable package. This durable liner is shaped for fit and flexibility, with cushioning comfort and excellent limb conforming properties. It fits a wide range of users.

The unique fabric improves the fibre-to-gel bond, reduces pistoning, and makes donning the socket easier. Mineral oil is infused into the liner to help absorb shear forces and maintain moisture.

Features and Benefits

- Retro-fits with industry standard liners of equal thickness and profile
- Infused with mineral oil to moisturise the skin and absorb shear forces
- Unique fabric provides a superior fibre to gel bond, reducing pistoning and easing socket donning
- 41cm long for the perfect fit
- Activity Level K1-K3

The ContexGel.basic is a conical shaped liner, constructed using 3mm of uniform, soft ContexGel. making it ideal for below-knee and above knee amputees with bony and pressure sensitive residual limbs.

The viscoelasticity of the polymer gel ensures even pressure in the socket and reduces shear forces, combined with medicinal white oils and antibacterial properties to nourish and restore stressed residual limb skin. The liner is supplied with a stabilising matrix option, to eliminate longitudinal stretching of soft residual limb tissue.

Features and Benefits

- Ideal for users with a low to moderate activity level (1-3)
- Can be provided without a distal connection for vacuum sockets
- Offers superior protection and optimised shock absorption over the entire limb
- Excellent circumferential elasticity compensates for residual limb volume changes
- Circular knit design eliminates the need for lateral 'flat-lock' seams which were subject to excessive friction
- Thermo-formable at 60°C (140°F)
- Distal rotation control supports the user when guiding their residual limb into their prosthesis
- Soft silicone rotation caps

Ordering Information

Activity Level Descriptions

Level 1: Patient is capable of using a prostheses in order to walk on level floors with a steady gait

Level 2: Patient is capable of overcoming low obstacles such as kerbs, single steps or uneven floors

Level 3: Patient is capable of moving with a prostheses at varying walking speeds, and is able to overcome everyday obstacles. Can be considered an 'unlimited outdoor walker'

Size Information

Measure the distal circumference at 4cm from the distal end of the residual limb. Choose the liner size that accommodates that dimension, whilst also taking into consideration the proximal circumference (measured 30cm above the distal end of the residual limb). Having defined the size required, please refer to the table adjacent for part number information.

*5.2mm without distal connection
14mm with distal connection

Technical Information

Material	Polymer Gel - dermatologically tested, inhibits bacteria, hypo allergenic
Matrix	Optional
Length	Approx 37cm
Amputation Level	Transtibial and Transfemoral*
Distal Connector	Pin Adapter or Cushion
Activity Level	Low to Moderate
Warranty	6 months

*Note: For transfemoral use it is advised that only the basic (3mm) option should be chosen.

The ContexGel.soft is a conical shaped liner with a 6mm anterior wall thickness and 3mm posterior wall thickness that allows the knee to bend easily in the socket. Ideal for use by below-knee amputees with bony residual limbs, and can be used as a suitable substitute for soft tissue over the tibial crest and distal end.

The viscoelasticity of the polymer gel, combined with medicinal white oils and antibacterial properties ensures even pressure in the socket while reducing shear forces and restoring the skin of stressed residual limbs. It has a stabilising matrix option to prevent longitudinal stretching of soft residual limb tissue.

Features and Benefits

- Ideal for users with a low to moderate activity level (1-3)
- Can be provided without a distal connection for vacuum sockets
- Offers superior protection and optimised shock absorption over the entire limb
- Excellent circumferential elasticity compensates for residual limb volume changes

Suitability Chart

Amputation Type	ContexGel Liners Socket Comfort
Pear-shaped below-knee (Transtibial)	●●
Normal, cylindrical below-knee (Transtibial)	●●●●
Bony, conical below-knee (Transtibial)	●●●●

Key: Optimal: ●●●● Good: ●●● Suitable: ●

Size Information

Measure the distal circumference at 4cm from the distal end of the residual limb. Choose the liner size that accommodates that dimension, whilst also taking into consideration the proximal circumference (measured 30cm above the distal end of the residual limb). Having defined the size required, please refer to the table adjacent for part number information.

*9mm without distal connection
15mm with distal connection

Technical Information

Material	Polymer Gel - dermatologically tested, inhibits bacteria, hypo allergenic
Matrix	Optional
Length	Approx 37cm
Amputation Level	Transtibial*
Distal Connector	Pin Adapter or Cushion
Activity Level	Low to Moderate
Warranty	6 months

*Note: For transfemoral use it is advised that only the basic (3mm) option should be chosen. See page 176.

A medical-grade mineral oil is contained in all Silipos gels, which gradually diffuses to moisturise and lubricate the skin.

Even in changing environments, the gel has the ability to conform to whatever shape or surface contour it comes into contact with. Because of the elasticity and conformability, the interface can adapt to the patient rather than the other way around.

The soft gel of the LA liner provides superior skin conditioning and comfort, for the low to moderately active patient, and is especially effective when used as a cushion liner with suspension sleeve, with or without a suction valve.

Features and Benefits

- Medium durometer gel makes this liner particularly suitable for low to moderately active patients, whilst providing increased skin care and comfort
- Keeps skin and scar tissue soft and pliable
- Prevents skin from becoming dry and fights the development of calluses
- Helps prevent contact dermatitis and skin sensitivity problems
- Available in tapered and uniform profiles for both pin and cushion liners
- Available in the standard and the more conical, plus version
- 3mm, 6mm and 9mm gel options with 3mm thickness posteriorly to accommodate knee flexion

Sizing Information

Size	Distal Relaxed	Distal Fully Stretched	Proximal Relaxed	Proximal Fully Stretched
Medium	20cm	30cm	23cm	41cm
Medium +	23cm	30cm	33cm	53cm
Large	23cm	38cm	38cm	56cm
Large +	30cm	41cm	41cm	68cm
X-Large	30cm	51cm	41cm	76cm

By measuring your patient, and finding out where their measurements are in relation to the liners measures, you can select a liner which is firm in fit (for more active patients), relaxed in fit (for less active patients who will be sitting more), or for the middle fit, which is suitable for the majority of patients. An example would be if your patient's distal measurement is 28cm, and the proximal measurement is 42cm, then he/she would fit perfectly in the mid-range of the Medium+.

Uniform - has a uniform thickness throughout the liner with the exception of the gel in the posterior.

Tapered - has 3mm additional gel in the distal 10cm for bony and conical residual limbs. The gel's flexibility is similar to having a distal end pad placed in the liner.

Technical Information

Material	Soft Polymer Gel
Matrix	None
Length	Approx 38cm
Amputation Level	Transtibial
Distal Connector	Pin Adapter or Cushion
Impact Level	Low/Medium (K1 to K2)

Sleeves

SureFit Sleeve

The SureFit Sleeve is constructed using High-Density TPE Gel (HD Gel) to provide maximum comfort for the patient and long-lasting security. With a 30° pre-flexion it allows for ease when bending and reduces bunching behind the knee; whilst the intelligent weave is adapted to differing areas of stretch and wear.

Features and Benefits

- 30° pre-flexion
- 3mm of uniform thickness
- Low modulus of elasticity for correct compression and stability
- One length (400mm) to accommodate most users in three sizes
- Two colour options available: Grey or Beige

Innovative weave design

Warranty	6 months

ContexGel.sleeve

The Streifeneder ContexGel.sleeves ensure correct suspension and fit in lower and upper limb prosthetic applications. They're effective at keeping air out of elevated system sockets and keeping the prosthesis firmly in place. Smaller sizes are suitable for upper limb below-elbow prosthetic sockets; larger sizes are suitable for below-knee amputees.

The latest bi-elastic knit design prevents tension and pinching on the knee joint, with 3mm antibacterial Polymer Gel for optimal residual limb health.

Features and Benefits

- Conical shaped sleeve
- Available in two colours: mixed anthracite or sand
- Round-knit design with no lateral seams
- Soft, abrasion-resistant textile cover which can be easily donned or doffed
- Features an outer matrix to eliminate elongation in the distal and proximal area
- Excellent circumferential elasticity compensates for residual limb volume changes

Liners - Streifeneder - ContexGel.sleeve

Size Information

ContexGel Knee Sleeves are available in six sizes. When determining patient size, please position the sleeve so that the middle section is sat over the knee/elbow joint.

To determine the optimal size of the knee sleeve, measure the distal socket circumference and the proximal thigh circumference (approx. 15cm above the centre of the knee joint).

ContexGel.protect

To avoid premature tearing of the ContexGel knee sleeves, we recommend using the ContexGel.protect as a protective cover for sharp-edged prosthetic sockets. This protective cover is made of durable and expandable fabric and has an inner silicone edge on the distal side to prevent slipping.

ContexGel.protect cover

Genesee Gel Sleeve

The Genesee Gel Sleeve from College Park can be used as a primary suspension method, or with a suction or vacuum suspension. The sleeve is made of hypo-allergenic material that has been infused with mineral oil to help protect against shear and friction, while also moisturising skin and scar tissue. The sleeve's 3mm thickness provides comfort and knee flexion.

Features and Benefits

- Reinforced interior for puncture-resistance
- Durable fabric-to-gel bond
- Available in 5 sizes
- 2 neutral tones (Grey or Tan)

Genu Sleeve

The Genu is a soft silicone suspension sleeve that is 3mm thick and designed for use with transtibial prostheses. It is gently tapered and, though not pre-flexed, the elasticated fabric outer cover has a more openly knitted section over the patella to allow easy knee flexion.

This high level of flexibility is achieved thanks to Össur's expertise in round-knit technology. As a consequence, even when flexed, the sleeve is virtually wrinkle-free, and the user has a lot of freedom of movement.

Though it was designed to be used with a suction system to provide an excellent level of suspension, it can also be used as a stand-alone suspension sleeve for patients who are less active, or require a sleeve that allows easier knee flexion.

The Genu Sleeve is supplied with a sleeve protector as standard, though these can also be purchased separately. They're made from a durable fabric, which helps prevent damage from the edge of the socket and thereby improve the longevity of the sleeve. Silicone pimples on the bottom edge of the sleeve keep it firmly in place on the socket.

Features and Benefits

- Highly flexible due to Össur round-knit technology
- Virtually wrinkle-free fit
- High freedom of movement for the user
- Protective sleeve included

Cosmesis

Skinergy Plus provides an extremely high level of cosmesis for the below-knee user, incorporating a uniquely seamless finish and the latest innovation in silicone technology.

Because of its ease of use, increased durability, and improved realism, Skinergy Plus is a market leader for cosmetic off the shelf products.

Features and Benefits

- Integrated reinforcing mesh and advanced silicone material for a more durable finish
- Now available in 19 colour shades with unique TrueFinish™ micropigmentation and seamless finish for authentic realism
- Split or closed toe options to suit any foot size 220mm to 300mm
- Two calf sizes
- Easily removable for hardware adjustment, maintenance or repair
- Suitable for ankle disarticulation and partial foot applications
- Easy to clean using soap and water
- A Colour swatch kit is available to order to demonstrate all 19 shades
- 3-month warranty

Sandal and closed toe options

Part Number	Description
E24655	Skinergy Plus True Finish Swatch Kit

Skinergy covers can be requested with the following non-standard finishes: uncut, unpainted toenails. If a non-standard finish or bilateral cover is required, please specify when ordering.

TrueFinish Colours

Colour Matching:

These swatches are printed as guidance only. For colour matching, the swatch kits should be used (part number E24655).

LIMB-art leg covers combine high-grade Nylon material with cutting-edge design and technology to provide a robust, affordable cosmeses for all users of above and below knee prostheses.

These covers restore balance to the silhouette of the leg and play an instrumental role in raising patient confidence and self-esteem. With optional bright or patterned designs, they achieve the LIMB-art mission of 'stand out and stand proud'.

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- This prosthetic accessory weighs less than 250g which is balanced across the limb
- Made with maximum durability in mind, these covers are constructed from robust high-grade Nylon, known for its strength and toughness whilst retaining flexibility for ease of application
- Offering a range of over 20 solid colour and stock designs, as well as a bespoke design service. LIMB-art covers can be customised to suit any style. If your patient has a specific pattern, photograph or finish in mind, please contact our Customer Service Team
- With its flexible body, the cover can be easily opened and securely strapped to prostheses

Models

CORE
An elegant smooth design which gives an excellent leg/calf shape under trousers, leggings or long boots.

WAVE
The Wave leg cover features curved ridges for a modern, sleek appearance.

VENT
Designed with the 'super hero' in mind with vented and raised sections.

ULTRALIGHT
The most lightweight LIMB-art cover features a diamond cutout pattern that is particularly popular with a contrasting inner colour.

Technical Information

Weight of Unit (g)	Material	Build Height (mm)	Warranty
180 - 290	High Grade Nylon	330 - 407	1 Year

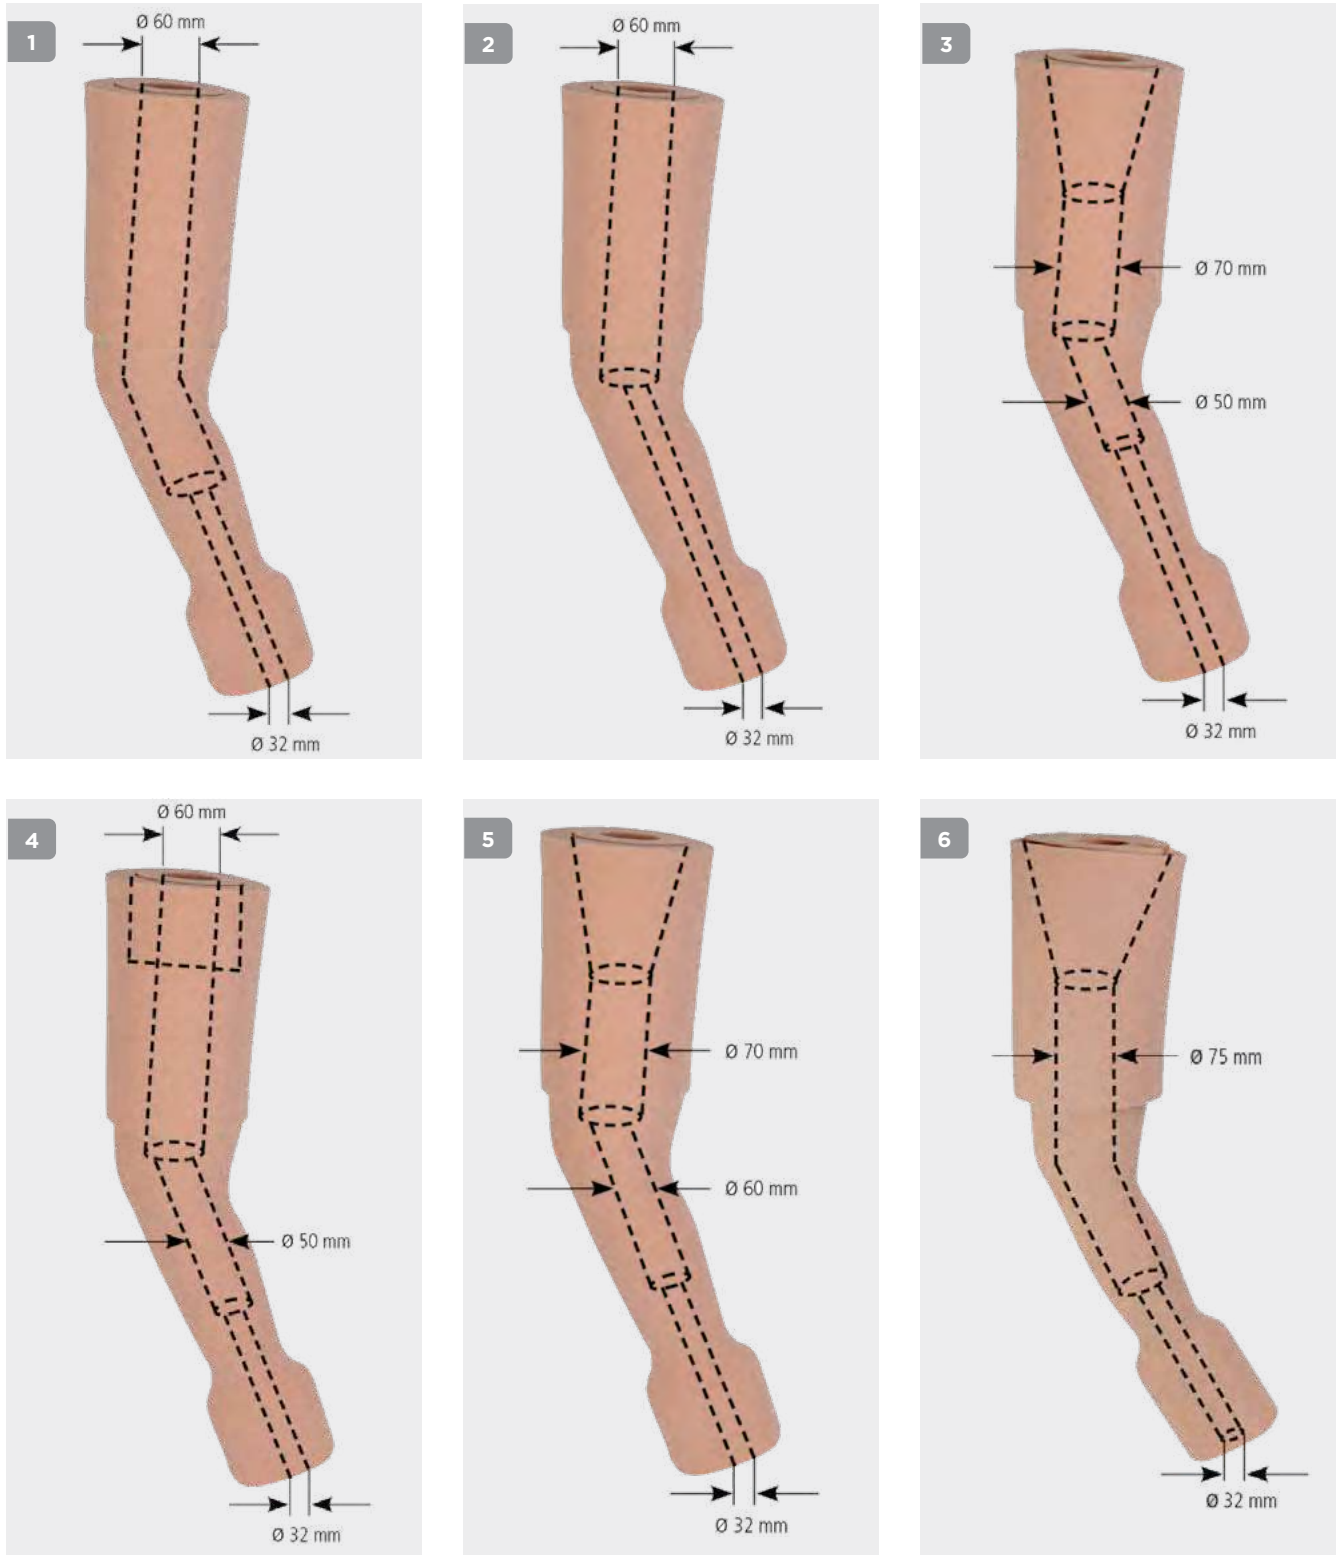

How To Measure for Ordering:

LIMB-art covers are available in four different lengths, short, medium, long and X Long (X Long only available in standard fit) as well as two different fits, standard and slim. Please follow the steps below to determine which length is required:

Amputation Level	Length	Circumference
Above Knee	Measure from the top of the foot shell to the top of the knee, remove 2cm to leave enough clearance between the top of the foot shell and bottom of the cover.	Measure the circumference around the widest part of the sound limb/leg socket.
Below Knee	Measure from the top of the foot shell up to Mid Patella Tendent, remove 2cm to leave enough clearance between the top of the foot shell and the bottom of the cover.	

For more information or to place an order, please contact our Customer Services Team.

High Definition Custom Silicone Cosmesis

Steeper invest in devising the most natural appearance covers for upper and lower limb prostheses, as well as cosmetic restorations and individual digits.

Our High Definition Custom Silicone cosmeses are sculpted in-house at our Silicone Clinic, in close consultation with the patient, and are designed bespoke to individual requirements.

Unlike many similar products, our fabrication techniques involve colouring the silicone material prior to sculpting, as opposed to surface painting. This process allows for the layering of different shades of silicone to give a translucent finish to the cosmesis, achieving an effect similar to natural skin.

Lower limb products within the range include:

- Individual toes
- Partial feet
- Full or partial limb covers
- Custom liners
- Cosmetic restorations

Custom silicone products are also available for upper limb patients. Please refer to the Steeper Upper Limb Catalogue for further information.

Features and Benefits

- Unique Spectromatch electronic colour matching process for a near-perfect match to an individual's skin shade
- Each cosmesis is sculpted by hand to meet the patient's specific requirements
- Realistic appearance and touch
- Skin pigmentation, freckles, veins, hair and tattoos can be incorporated for an authentic finish
- Fabrication techniques involve colouring the silicone material prior to sculpting to give a translucent finish
- Lower limb and upper limb products available, including partial limbs and digits
- Easy to clean using soap and water
- Nails can be painted

Ordering Information

Custom silicone products are made specifically to order. For further details or to place an order with the Silicone Clinic, please email silicone@steepergroup.com or call +44 (0) 870 850 8228.

Cosmesis - The Silicone Clinic - High Definition Custom Silicone

Expert Technicians

Artists in their own right, all our silicone technicians are exceptionally skilled and can make any design, colour and shape required in silicone.

From new material development to performance testing, our technicians often create more "avant-garde" designs to further develop their skills and identify improved ways of working.

Bespoke Service

Each silicone prosthesis is tailored to the user's exact requirements, from tattoos to painted nails, veins to surface hair and everything else in between.

Not only are all our products cosmetically tailored to suit the user but vitally, we always ensure the solutions we create are comfortable and functional, providing users with a natural and realistic looking prosthesis that suits their lifestyle.

Technical Information

Spectromatch

The Spectromatch colour matching system stores 22,000 colours and offers a far superior colour matching process to traditional swatches.

As the system stores a large number of colours, numerous measurements can be taken and accurate colour options recorded in minutes, regardless of the lighting conditions, to match individual skin tones.

The following steps must be taken for the process:

- Digital photography to show details of colour blending, hairs, veins, nails, freckles and tattoos of the sound limb.
- Cast modification to ensure the prosthesis fits securely over the residual limb.
- Check socket manufacture - for all partial feet and cosmetic restorations, to ensure suitable comfort and suspension.
- Colour matching using the Spectromatch camera - please contact the Silicone Clinic, who will be able to provide a camera and details of the required steps within this process.

Case Study

Charlotte Swift Travel Journalist

Extreme sports lover, Charlotte, talks about life as a below the knee amputee and her ongoing journey to stay active so that she can spend as much time as possible with her four year-old son.

Before the accident, Charlotte juggled a busy life in London and worked full time as a journalist. In 2013, she was a passenger in a car when it crashed.

Following her rehabilitation, Charlotte wanted to return to her normal activities as soon as possible - from caring for her young son and returning to work and even her previous passion for extreme sports!

"For my everyday leg, I wanted something realistic." Able to be worn under all types of clothing, Charlotte's custom limb was made even more personal by including a swift tattoo to the foot to match her name - something our skilled technicians were more than happy to add.

Charlotte is thrilled with her cosmesis and the way it makes her feel "The ability to lead as normal a life as possible is so important to me, and my high definition silicone leg allows me to do just that."

Lower Limb Custom Silicone Cover

Socks

Pro Armour Lite

The Pro Armour Lite is a protective neoprene sock designed specifically for use with an endoskeletal prosthetic foot/ankle. Lightweight and simple to use, it is applied directly over the prosthetic foot shell and structural ankle components.

The Pro Armour Lite aims to reduce damage and premature wear associated with exposing prosthetic devices to sand, dust, dirt and water. The result is a cover that provides users with the confidence they need to explore more, and clinicians gain peace of mind knowing there is additional protection available whenever necessary.

Features and Benefits

- Splash, dust, sand, and dirt proof
- Washable and reusable
- Knitted sock provided to reduce friction when don/ doffing
- Designed to extend the life of prosthetic foot components
- Suitable for users of all activity levels
- Made for use with footwear only
- Available in three sizes

Compatible devices

The Pro Armour Lite is generally suitable for SACH, uniaxial, multiaxial, energy storing and patient adjustable feet.

If you're unsure if the Pro Armour Lite will fit your patient's device, speak to your Steeper Product Manager.

Increases patient confidence in everyday environments like off road tracks and the beach

Encourages activity and positive wellbeing

The Relax range from Össur provides a pain-relieving effect from phantom limb pain, phantom limb sensation and idiopathic residual limb pain. This is due to the metallurgical knitted fabric screening against electromagnetic influences. The Relax Night Care socks are the ideal complement to the Relax liners because they can be worn at night as well.

Umbrellan fabric is a unique, patented knitted fabric with an excellent electromagnetic screen. The materials used on the metallurgical base are hypoallergenic, climate-regulating and have antibacterial properties.

The socks are elasticated with a soft top band providing a snug and comfortable non-slip fit. The Clima-Comfort® technology ensures a high degree of comfort by transporting moisture rapidly from the skin to the surface of the stocking, reducing sweating. At the same time, the skin has an optimal oxygen supply to prevent it drying out.

TEST WITHOUT RISK
"MONEY BACK
GUARANTEE"

Features and Benefits

- Pain-relieving effect due to integral electromagnetic shield
- Clima-Comfort technology - warming and cooling function depending on environmental temperature
- Elastic knit with soft top bands for comfortable, reliable fit without slipping or constricting
- Suitable for wearing day and night or whenever the prosthesis is not being worn

Ordering Information

Circumference A (Level of top band end of residual limb)	Length	Size	Part Number
20-26cm	35cm	S	N188000S
26-33cm	35cm	M	N188000M
33-42cm	35cm	L	N188000L
42-52cm	35cm	XL	N18800XL
52-62cm	35cm	XXL	N1880XXL

Size Selection

1. Depending on the desired length (L), measure the circumference (A) 35cm above the end of the residual limb.
2. Residual limb length L and the circumference are the basis for selecting the correct Össur RELAX Night Care size.

Important information

The Össur Relax Night Care Sock is available in one standard length (35cm). The sock can be carefully sewn over for residual limbs < 30cm.

Money Back Guarantee

For Relax Night Care Sock

To help assess if the Relax Umbrellan system will reduce or eradicate your patient's phantom limb pain, we are offering a risk free "Money Back Guarantee" for the Össur Relax Night Care Sock. If after 5 days your patient feels no benefit from the product, you can return it to us for a full refund.

If your patient feels a reduction in pain from the sock, they will receive the same benefit from the liner. Likewise, if no benefit is felt from the sock, a reduction in pain would not be expected from the liner.

▲ - Denotes Compression, add 1 for CCL1 and 2 for CCL2

The ComforGel sock comes in three size and two thickness. They consist of a soft and stretchable cotton inner and outer fabric, sandwiching a soft polymer gel.

The emphasis on the softness of both the gel and the fabric, as well as the ease with which the socks can be stretched when donning, results in a high level of comfort and durability when using these products. This makes them ideal for patients who have sensitive or bony residual limbs, as well as those who are more active.

Features and Benefits

- Colour coded stitching to easily identify the two available thicknesses - 3 ply (yellow) and 5 ply (green)
- Incorporates a soft polymer gel, to provide good shock absorption, sandwiched between two layers of fabric for durability
- The softness and stretchability of the fabric ensures ease of donning, and high levels of comfort
- Transtibial sock accommodates up to 51cm circumference
- Transfemoral sock accommodates up to 66cm circumference
- Symes sock accommodates up to 36cm circumference
- Easily conforms to irregular residual limb shapes and sizes

Streifyderm

The Streifyderm Gel Sock consists of a nylon fabric sock lined with a 2mm polymer gel, particularly suitable for the moderately active transtibial amputee.

Streifyderm Cushion

Aimed at meeting the needs of the more active lower extremity amputees, or those with more bony or sensitive residual limbs, the Streifyderm Cushion uses an elasticated nylon sock and a thicker 3mm polymer gel lining.

Streifyderm Endurance

The Streifyderm Endurance is made up of two elasticated nylon socks with a 2mm polymer gel sandwiched between them to meet the needs of the very active lower extremity amputee.

Features and Benefits

- Polymer gel contains premium medical mineral oil
- Improved skin care as the oil is released
- Reduced skin friction and abrasion
- Increased cushioning and comfort
- Washable
- Suitable for use in many types of socket, regardless of construction or the material used

Ordering Information

Size Selection

Measure the length of the residual limb from just above the transfemoral condyles, the distal circumference at approximately 4cm from the distal end and the proximal circumference at the patella. Choose the sock appropriate to these measurements, checking that the length of the gel indicated is adequate to allow it to come above the top edge of the socket.

Hood Socks - Nylon Sheath

This nylon residual limb sock wicks away perspiration, and reduces friction between the limb and the prosthesis for all-day comfort.

Features and Benefits

- Made from 100% Nylon
- Available in pocket or bottom seam
- Constructed to protect from abrasion
- Machine wash and air dry

Socks - Trulife - Hood Socks

Ordering Information

1. Please order in multiples of six
2. Determine part number using the tables below, selecting either with pocket seam or bottom seam according to requirements

Application Recommendation

Ideal for users who have delicate/sensitive residual limb skin, or require perspiration control.

Ordering Example

Sheath with pocket seam, 6" Top Width, 17" Length = N54012U03

With Pocket Seam Ordering Information

Length		Top Width (Proximal)			
		Extra Narrow	Narrow	Regular	Wide
		10-13cm	15-18cm	20-23cm	25-30cm
Short	30-35cm	N54011U02	N54012U02	N54013U02	N54014U02
Regular	40-45cm	-	N54012U03	N54013U03	N54014U03
Long	51-61cm	-	N54012U04	N54013U04	N54014U04
Extra long	66-76cm	-	-	N54013U05	-

Bottom Seam Ordering Information

Length		Top Width (Proximal)			
		Extra Narrow	Narrow	Regular	Wide
		10-13cm	15-18cm	20-23cm	25-30cm
Short	30-35cm	N54021U02	N54022U02	N54023U02	N54024U02
Regular	40-45cm	-	N54022U03	N54023U03	N54024U03
Long	51-61cm	-	N54022U04	N54023U04	N54024U04
Extra long	66-76cm	-	-	N54023U05	-

This polyester and Lycra® residual limb sock utilises COOLMAX® fibres to wick away perspiration for all-day comfort.

Features and Benefits

- Available in 3 and 5 ply
- Soft and lightweight material ensures user comfort and reduces irritation
- Non-chafing and breathable characteristics, ideal for active users
- Available with a distal hole.
- Machine wash and air dry (do not use laundry detergent)

Ordering Information

1. Please order in multiple of six
2. Determine part number using the chart below
3. To order with a distal hole, replace the 'N5' prefix with 'NH' - e.g. **NH1135U12**

Application Recommendation

Ideal for users who have delicate/sensitive residual limb skin, or require perspiration control.

Ordering Example

3 ply Cool Sock II, 7" Top Width, 12" Length = **N51135U12**

Nylon Protective Sleeves

Fine, highly elastic nylon protective sleeves that act as a second skin under the cotton residual limb sock.

The material textures ensure adherence of the sheath to the skin, and guarantees that the cotton residual limb sock dons easily.

Should be cared for with lukewarm water and a mild neutral detergent.

Features and Benefits

- High level of wearing comfort
- Colour: white
- 2 sheaths in each pack
- Washable

Socks - Uniprox - Nylon Protective Sleeves

Skin-Fix Donning Sleeve

Skin-Fix is to be donned on the residual limb before slipping into the socket. Due to the low friction design, donning of the socket becomes an easy and comfortable operation.

Then, the Skin-Fix can be pulled out through the valve easily.

Features and Benefits

- Low friction
- Long-life durability
- Simple application

Socks - Uniprox - Donning Sleeve

Structural and Socket Components

Waterproof
Components

The blue water symbol indicates that a product or component is waterproof, has water resistant fasteners, and is suitable for occasional submersion in water. Please observe any product-specific caveats. Always rinse with fresh water and dry following exposure to salt water or chlorinated water.

Water
Resistant
Components

The orange water symbol indicates that a product or component with the orange water symbol is water resistant with water resistant fasteners, making them suitable for use when there is the possibility of occasional contact with water. These are not suitable for full submersion. Always rinse with fresh water and dry following exposure to salt water or chlorinated water.

Aluminium 30mm Structural Components

Part Number	Manufacturer	Description	Weight Limit
1* NAAA210	TL	4-Hole Pyramid Adapter	160kg
2* NAAA211	TL	4-Hole Female Adapter	160kg
3* NAAA212	TL	4-Hole Rotatable Adapter - Note: This part number is for the 4 hole base plate only. It will take either NAAA214-01 or NAAA216-01, these must be ordered separately.	160kg
4* NAAA214-01	TL	Rotatable Female Insert	160kg
5* NAAA216-01	TL	Rotatable Male Pyramid Insert - Note: This part number is for the insert only. It can be used in either the 4 bolt adapter NAAA212 or the 3-Prong laminating adapter NAAASS237, these must be ordered separately.	160kg
6* NAAA209	TL	4-Hole Single Offset Pyramid Adapter - Offset by 5mm in one direction only.	160kg
7* NAAA208	TL	4-Hole Double Offset Pyramid Adapter - Offset by 5mm in two directions.	160kg
8* NAAA100	TL	Adjustable Height Clamp Adapter - This clamp allows up to 25mm adjustment in height, with the two bolt clamp being sufficient to hold the position, unless there is likely to be any significant impact in the patient's gait, such as jumping or running.	160kg
9* NAAA135	TL	Pylon with Integral Receiver - This 30mm pylon with integral female receiver can be used with either the NAAA100 or NAAA225 tube clamps, but at 420mm long, is suitable for most transtibial applications and can be cut down to suit.	160kg

*Note: The weight limit is 123kg for the NAAA aluminium components above for patients of K4 activity level.

Manufacturer: TL = Trulife

Aluminium 30mm Structural Components

Part Number	Manufacturer	Description	Weight Limit
1* NAAA221	TL	35mm Double-Ended Adapter	160kg
2* NAAA222	TL	45mm Double-Ended Adapter	160kg
3* NAAA223	TL	60mm Double-Ended Adapter	160kg
4* NAAA224	TL	75mm Double-Ended Adapter	160kg
5* NAAA200	TL	420mm Bonded Pylon	160kg
6* NAAA202	TL	420mm Aluminium Pylon Bonded to Male Adapter	160kg
7* NAAA225	TL	30mm Clamp Adapter	160kg
8* NAAA285	TL	Foot Pyramid - This foot adapter is specifically for use with the Seattle Lightfoot, Natural or SACH, though these now come with an adapter already fitted.	136kg

Stainless Steel 30mm Structural Components

Part Number	Manufacturer	Description	Weight Limit
1* NAAASS237	TL	3-Prong Laminating Piece Stainless Steel - This part number is only for the adapter and can take either NAAA214-01 or NAAA216-01, or any component with an M36 threaded top.	136kg

*Note: The weight limit is 123kg for the NAAA aluminium components above for patients of K4 activity level.

Manufacturer: TL = Trulife

Titanium 30mm Structural Components				
Part Number	Manufacturer	Description	Weight Limit	
1	NTI-100C-FL	APC	Titanium Tube Clamp Adapter	166kg
2	NTI-100C-SH	APC	Titanium 30mm Tube Clamp Adapter Short - This adapter has been designed to provide a build that is approximately 10mm shorter than the standard clamp, with the knurled inner surface of the clamp providing the necessary grip to prevent rotation	166kg
3	NTI-205C	APC	Titanium 5 Degree Angled Tube Clamp Adapter (pictured)	166kg
	NTI-210C		Titanium 10 Degree Angled Tube Clamp Adapter	166kg
	NTI-215C		Titanium 15 Degree Angled Tube Clamp Adapter	166kg
	NTI-220C		Titanium 20 Degree Angled Tube Clamp Adapter	166kg
4	NTI-120P	APC	Titanium Tube Clamp w/ Pyramid Adapter	166Kg
5	NTI-740L	APC	Titanium 4 Prong Laminating Base w/ Fixed Pyramid Adapter	166Kg
6	NTI-110LONG	APC	Titanium Pylon with Receiver Adapter (Overall length = 96.5mm) - This pylon, with its integral female receiver has an overall length of nearly 100mm, but can be cut down very short and with the use of NTI-100C-SH can provide a double adapter of less than 60mm, with rotation.	166Kg
	NTI-110SH	APC	Alternatively, use the NTI-110SH (pictured) which is approximately 50mm in length.	
7	NTI-105C	APC	Titanium Heavy Duty Tube Clamp, 5mm Offset	166kg
8	NTI-125P	APC	Titanium Pyramid / Receiver Adapter	166kg
9	NTI-112-P	APC	Titanium 30mm Pylon (SHORT) w/Pyramid Adapter - Overall Length of 2.46" Accommodates 1 - NTI-100C	166kg
10	NTI-130D	APC	Titanium 30mm Dual Receiver Adapter	166kg
	NTI-132D	APC	Titanium 32mm Dual Receiver Adapter	166kg
	NTI-138D	APC	Titanium 38mm Dual Receiver Adapter	166kg
	NTI-145D	APC	Titanium 45mm Dual Receiver Adapter	166kg
	NTI-152D	APC	Titanium 52mm Dual Receiver Adapter	166kg
	NTI-160D	APC	Titanium 60mm Dual Receiver Adapter	166kg
	NTI-168D	APC	Titanium 68mm Dual Receiver Adapter	166kg
	NTI-175D	APC	Titanium 75mm Dual Receiver Adapter	166kg

Note: Whilst the components showing the blue water symbol are therefore waterproof, please note that these components do not have drainage slots.

Note: See pages 246-247 for the Mix and Match APC Alignment Adapters Component Build Height Information

Manufacturer: APC = [American Prosthetic Components](#)

Weight Limit Note: Please note that when ordering components from different ranges for the same limb build, the lowest rated component becomes the maximum weight limit.

Titanium 30mm Structural Components				
Part Number	Manufacturer	Description	Weight Limit	
1	NTI-465TRF	APC	Titanium 4 Hole Clamping Adapter (Centre Thread) with Rotatable Receiver	166kg
2	NTI-460TRM	APC	Titanium 4 Hole Clamping Adapter (Centre Thread) with Rotatable Pyramid	166kg
3	NTI-460TB	APC	Titanium 4 Hole Clamping Adapter with Centre Thread - This part number is only for the baseplate used on NTI-465TRF and NTI-460TRM. It will obviously take either NTI-50FS or NTI-00MS or any component with an M36 threaded top.	166kg
4	NTI-425BH	APC	Titanium 4 Hole Pyramid Adapter with Centre Hole	166kg
5	NTI-400B	APC	Titanium 4 Hole Pyramid Adapter	166kg
6	NTI-400A	APC	Titanium Offset 4 Hole Pyramid Adapter (Axial) - This adapter has the pyramid offset by 5mm in one direction.	166kg
7	NTI-400D	APC	Titanium Offset 4 Hole Pyramid Adapter (Diagonal) - This adapter has the pyramid offset by 5mm in two directions.	166kg
8	NTI-00MS	APC	Titanium Rotatable Pyramid with Male Thread and Centre Hole - This item can be used in the baseplate NTI-460TB, NSS-800BASE or and adapter with an M36 thread.	166kg
9	NTI-50FS	APC	Titanium Receiver with Male Thread - This item can be used in the baseplate NTI-460TB or any adapter with an M36 thread.	166kg
10	NTI-60FS	APC	Titanium Rotatable Receiver with Female Thread Height 36.3mm	166kg
11	NTI-01MS	APC	Titanium Rotatable Pyramid with Threaded Clamp	166kg

Note: Whilst the components showing the blue water symbol are therefore waterproof, please note that these components do not have drainage slots.

Note: See pages 246-247 for the Mix and Match APC Alignment Adapters Component Build Height Information

Manufacturer: APC = [American Prosthetic Components](#)

Structural and Socket Components - 30mm Titanium & Stainless Steel

Weight Limit Note: Please note that when ordering components from different ranges for the same limb build, the lowest rated component becomes the maximum weight limit.

Titanium 30mm Structural Components

Part Number	Manufacturer	Description	Weight Limit	
1	NTI-17TC2-BLACK	APC	440mm Pylon with Titanium Receiver Adapter BLACK	166kg
2	NTI-10TC2-BLACK	APC	262mm Pylon with Titanium Receiver Adapter BLACK	166kg
3	NTI-10TC2-I-BLACK	APC	262mm Pylon with Internal Titanium Receiver Adapter BLACK	166kg

This pylon has its adapter bonded to the inside of the tube, which some clinicians prefer the appearance of and also allows it to be cut much shorter, should the need arise.

Note: Whilst the components showing the blue water symbol are therefore waterproof, these components do not have drainage slots.

Stainless Steel 30mm Structural Components

Part Number	Manufacturer	Description	Weight Limit	
1	NSS-800LM	APC	SS 3 Prong Adapter with Rotatable Pyramid	125kg
2	NSS-850LM	APC	SS 3 Prong Adapter with Rotatable Receiver	125kg
	NSS-800BASE	APC	SS 3 Prong Adapter Threaded with Female Thread This part number is only for the adapter, as used on NSS-800LM and on NSS-850LM with their stainless steel pyramid and female receiver. It will take either NTI-50FS or NTI-00MS to provide a lighter build, or any component with an M36 threaded top.	125kg
3	NSS-50FS	APC	Stainless Steel Receiver with Male Thread This item can be used in the baseplate NTI-460TB or any adapter with an M36 thread.	136kg
4	NTI-420L	APC	Titanium Round 4-Hole Laminating Plate This simple 4.8mm thick lamination plate, with 4 M6 threaded holes, comes with 4 of each M6 x 20mm and M6 x 25mm water resistant screws and is ideal for laminate sockets, but can also be used on thermoplastic sockets, provided a flat surface can be achieved onto which a 4 hole adapter can be bolted.	166kg
5	NSS-01MS	APC	Stainless Steel Rotatable Pyramid with Threaded Clamp	136Kg
6	NSS-00MS	APC	Rotatable Pyramid with Male Thread	136kg
7	NTI-TF900SET	APC	Titanium Thermoplastic Socket Attachment Plate Set This two-piece socket attachment plate has been designed for use on thermoplastic sockets, to provide a flat mounting surface for any 4-hole adapter, but can be used on laminated sockets as well.	166Kg
8	NAL-TF900SET	APC	APC Aluminium Thermoplastic Socket Attachment Plate Set This two piece socket attachment plate has been designed for use on thermoplastic sockets, to provide a flat mounting surface for any 4 hole adapter, but can be used on laminated sockets as well.	100Kg
9	NAL-420L	APC	APC Aluminium Round 4-Hole Laminating Plate Threaded This simple aluminium plate, with 4 threaded holes, is ideal for use with laminate sockets, but can also be used on thermoplastic sockets, provided a flat surface can be achieved onto which a 4 hole adapter can be bolted.	100Kg

Note: These Stainless Steel components are not waterproof or water resistant.

Note: See pages 246-247 for the Mix and Match APC Alignment Adapters Component Build Height Information

Part Number	Manufacturer	Description	Weight Limit
1 NAAASMP450	TL	Socket Mounting Plate - includes expulsion valve insert and fabrication components. This lamination plate is supplied with an expulsion valve as standard, but can be used without, if required.	205kg
2 NMA10A3/T	SF	Heavy Duty Socket Adapter	175kg
3 NMA10A90/T	SF	Heavy Duty Socket Adapter	175kg
4 NMA11A11/T	SF	Heavy Duty Tube Clamp Adapter	175kg
5 NMA15A4/T225	SF	Heavy Duty 214mm Tube Adapter	175kg
NMA15A4/T445	SF	Heavy Duty 414mm Tube Adapter	175kg
6 NMA10A42/T	SF	Heavy Duty Slide Adapter	175kg

Note: The weight limit is 168kg for the heavy duty aluminium components above for patients of K4 activity level.

Manufacturer: TL= Trulife SF = Streifeneder

Heavy Duty Stainless Steel College Park Structural Components			
Part Number	Manufacturer	Description	Weight Limit
1 NHD-TTK-PA	CP	Transtibial Heavy Duty Kit with Pyramid Adapter (34mm Tube Adapter - 250mm length, 34mm Tube Clamp, 4-Hole Pyramid Adapter)	181kg
2 NHD-TFK-PA	CP	Transfemoral Heavy Duty Kit with Pyramid Adapter (34mm Tube Adapter - 430mm length, 34mm Tube Clamp, 4-Hole Pyramid Adapter)	181kg
3 NLP-RHD-S	CP	4-Hole Lamination Plate, Round, Heavy Duty, SS	181kg

Manufacturer: CP = College Park

Structural and Socket Components - 30mm & 34mm Heavy Duty Titanium

Weight Limit Note: Please note that when ordering components from different ranges for the same limb build, the lowest rated component becomes the maximum weight limit.

30mm & 34mm Heavy Duty Titanium Structural Components				
Part Number	Manufacturer	Description	Weight Limit	
1	NAAASMP450	TL	Socket Mounting Plate - includes expulsion valve insert and fabrication components. This lamination plate is supplied with an expulsion valve as standard, but can be used without, if required.	205kg
2	NHD-425BH	APC	Heavy Duty Titanium 34mm Pyramid Adapter	227kg
3	NHD-AL-PYLON	APC	34mm Aluminum Heavy Duty Pylon	227kg

Note: The weight limit is 168kg for the heavy duty aluminium components above for patients of K4 activity level.

Manufacturer: TL = Trulife APC = American Prosthetic Components

34mm Heavy Duty Titanium Structural Components				
Part Number	Manufacturer	Description	Weight Limit	
1	NHD-100C	APC	Heavy Duty Titanium Tube Clamp	227kg
2	NHD-110LONG	APC	Heavy Duty Titanium Receiver/Pylon Adapter - Long (82mm) Pylon	227kg
3	NHD-105C	APC	Heavy Duty Titanium Tube Clamp with 5mm Offset	227kg
4	NHD-132D	APC	Heavy Duty Titanium Dual Receiver Clamp	227kg
5	NHD-740L	APC	Heavy Duty Titanium 4-Prong Lamination Pyramid	227kg
6	NHD-100C-A	APC	Heavy Duty Tube Clamp with 30mm Receiver	227kg

Manufacturer: APC = American Prosthetic Components

USED EXCLUSIVELY WITH ZUMO FEET

Weight Limit Note: Please note that when ordering components from different ranges for the same limb build, the lowest rated component becomes the maximum weight limit.

Special Adapters				
Part Number	Manufacturer	Description	Weight Limit	
1	NMA11A15/A	SF	Aluminium Tube Clamp Adapter with Pyramid Ø 30mm	100kg
2	NMA10A41/T	SF	Titanium Female Lamination Adapter with Shift	100kg
3	NMA10A43/T60	SF	60mm Titanium Double Adapter with Shift	100kg
	NMA10A43/T75		75mm Titanium Double Adapter with Shift	100kg
4	NMA11A14/A	SF	Aluminium Double Adapter with Pyramid	100kg
5	NMA10A89/T	SF	Titanium Four Hole Female Adapter, Axial (Offset by 7mm)	100kg
6	NMA10A60/A41	SF	Aluminium Double Pyramid Adapter 15mm	100kg
	NMA10A60/A50		Aluminium Double Pyramid Adapter 23mm	100kg
7	NTI-115DM	APC	Titanium Dual Pyramid Adapter 16mm	166kg
8	NMA11A16/T	SF	Titanium Pyramid Adapter with 30mm Core	125kg
	NMA11A16/S		Stainless Steel Pyramid Adapter with 30mm Core	150kg
9	NTA-1	TL	Titanium Rotation Adapter, 220g	150kg
			The NTA-1 rotation adapter can be assembled onto any 4-hole connector and can rotate up to 5°, due to its elongated mounting hole. An additional socket adapter is not required.	
10	NTA-2	TL	Titanium Rotation Adapter, 268g	150kg
			The NTA-2 rotation adapter offers even more adjustment options and up to 30° rotation with the M36 threaded connector.	
11	NMA12A7	SF	Socket Attachment Block - with poplar wood, 4 countersink head bolts 22A5/M6x20 including lamination dummy 12A3/E2 and sealing grease 22A100 with plastic for optimal sanding.	125kg
12	NAL-CPF-400	APC	Aluminium Round 4 Hole Laminating Plate Anodised BLACK (5/8" Thick with 1/2" Tie Groove) Includes Screws	136kg

Note: Whilst the components showing the blue water symbol are therefore waterproof, these components do not have drainage slots.

Manufacturer: SF= **Streifeneder** APC = **American Prosthetic Components** TL = **Trulife**

Weight Limit Note: Please note that when ordering components from different ranges for the same limb build, the lowest rated component becomes the maximum weight limit.

College Park- C100 Cylindrical Shuttle Lock

The C100 Cylindrical Shuttle Lock by College Park is used as a modular lock system for lower limb prosthesis users. It is made of high-strength durable nylon.

Lightweight with a secure fit, the release pin can be easily cut to the right length for the prosthesis. Supplied with two ratchet plunger pins in variety of lengths.

Features and Benefits

- Manufactured from high-strength and durable nylon
- Ratchet plunger pins are available in 5 sizes
- C100 Fabrication Kit available for ease of manufacture with the Shuttle Lock
- Designed for direct mounting with a 4-hole adapter
- Lightweight build, weighing 88g with the ratchet pin
- Rated to 136kg

C100 Fabrication Kit

The C100 Fabrication Kit provides the practitioner the ability to form adequate space for the lock to sit in.

Part Number
NC100-SLK-FAB

Features and Benefits

- Gives correct placement and formation of the release button hole
- Provides guides to drill an industry standard 36mm square 4-hole pattern for endo-components
- Can be used for multiple socket fabrication set-ups.

Structural and Socket Components - Locking Systems

Streifeneder Waterproof Shuttle-Lock

The Shuttle lock NMA15S2/W is characterised by its very small design and a high strength aluminium housing. Suitable for fresh, salt or even chlorinated water and manufactured in an excellent quality. The aluminium housing can be removed from the deep-drawing socket and used for the laminating socket. Processing is carried out using common deep-drawing or laminating methods.

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Ordering Information

Waterproof Shuttle-Lock			
Part Number	Lock Type	Pin	Weight
1 NMA15S2/W	Shuttle-Lock	Rastered	90g

Spare Parts Ordering Information

See page 280 for a full list of Series 150 spare parts

Features and Benefits

- No body weight restriction because the lock is not a weight bearing component
- Activity level: 1 to 4
- Can be used for thermoplastic and laminated sockets
- Aluminium housing
- Mounting height: approx 23mm
- Waterproof*
- Incl. Lamination dummy NMA10S1/E6
- Incl. special sealing grease NMA22A100
- Twist-proof pin guide made of stainless steel
- Locking unit completely exchangeable

Streifeneder Locking Systems

The large choice of locking systems enables the technician to create a socket connection adapted to the patients' requirements. Every Streifeneder lock system unlocks under tensile load, which enables the patient to easily unlock the prosthesis even under tension, e.g. in a sitting position. A lockable mechanism is offered as an accessory for the clutch locks, which makes it easier for geriatric patients, in particular, to take off the prosthesis. The locking systems are differentiated by the locking type and housing design.

Series 100

The lock series 100 is made of synthetic material, which makes it lightweight and very small. It is suitable for users of any weight category. In connection with a socket attachment block NMA12A7(see page 252) the deviation of the socket gradient and the plumb line can easily be corrected.

Features and Benefits

- no body weight restriction because the lock is not a weight bearing component
- Activity level: 1 to 4 for NMA10S1 and NMA10S2
- Can be used for laminated sockets
- Plastic housing is temperature resistant up to 200 °C
- Locking unit is exchangeable
- Replacement button extension available on page 280

Series 150

The lock series 150 is characterised by its very small design and a high-strength aluminium housing. The aluminium housing can be removed from the deep-drawing socket and used for the laminating socket. Processing is carried out using common deep-drawing or laminating methods. In conjunction with a NMA12A3, NMA12A5 or NMA12A7 Socket Attachment Block, the deviation of the socket gradient and plumb line can be easily corrected.

Features and Benefits

- No body weight restriction because the lock is not a weight bearing component
- Includes 1 pin
- Activity level: 1 to 4 for NMA15S1 and NMA15S2
- Activity level: 1 to 3 for NMA15S3
- Can be used for thermoplastic and laminated sockets
- Aluminium housing
- Mounting height: approx 23 mm
- Clutch-Lock with "EasyClick" system: optimised pull-in and release mechanism
- Twist-proof pin guide made of stainless steel
- Locking unit completely exchangeable

Spare Parts Ordering Information

See page 280 for a full list of Series 150 spare parts

Series 200

The lock series 200 by Streifeneder is made of aluminium and is distinctive due to its light and flat design. Distally, various socket adapters can be used.

Features and Benefits

- Max. patient weight: 125kg
- Includes 1 pin & lamination disc
- Activity level: 1 to 4 for NMA20S1 and NMA20S2
- Activity level: 1 to 3 for NMA20S3
- Can be used for thermoplastic and laminated sockets
- Aluminium housing

Please note: For direct load transmission from lamination disc to different adapters use the countersunk screw NMA22A5/M6x40

- Clutch-Lock with "EasyClick" system: optimised pull-in and release mechanism light, flat construction
- Non-rotating lamination disc with multiform ring
- Continuous guide bushing made of stainless steel
- Distally with channel for planar connection of all socket adapters with 4-hole connection
- Easy cleaning and replacing of complete locking unit is possible without dismantling the prostheses
- With Lamination Disc NMA20S1/E5

Ordering Information

Spare Parts Ordering Information

See page 280 for a full list of Series 200 spare parts

Series 300

The latest weight-optimised lock series 300 from Streifeneder is made of wear-resistant plastic is very suitable for direct lamination or for complete exchange, if you utilise a lamination dummy NMA30S1/D56 - NMA30S1/D76.

Different lamination discs and socket adapters can be attached with 6 screws in the distal end of the socket.

Features and Benefits

- Max. body weight: 100 kg
- Activity level: 1 to 4 for NMA30S1 and NMA30S2
- Activity level: 1 to 3 for NMA30S3
- Build Height: 33mm
- Can be used for thermoplastic and laminated sockets
- Plastic housing is temperature resistant up to 200 °C
- Clutch-Lock with "EasyClick" system: optimised pull-in and release mechanism
- Lightweight, weight-optimised construction made of plastic
- Multifunctionally applicable
- Continuous guide bushing, rotation secured, made of stainless steel
- Locking unit completely exchangeable
- Easy cleaning and replacing of complete locking unit is possible without dismantling the prostheses
- Incl. special sealing grease NMA22A100

Series 400

The series 400 from Streifeneder is especially suitable for AK and BK-residual limbs with very large distal circumference. The housing, made of a high quality aluminium alloy, is distally fitted with an adjustment core for a compact construction.

Features and Benefits

- Max. patient weight: 125kg
- Activity level: 1 to 4 for NMA40S1 and NMA40S2
- Activity level: 1 to 3 for NMA40S3
- Mounting height: approx. 33 mm
- Can be used for thermoplastic and laminated sockets
- Aluminium housing

Please note: order press button extensions for geriatric patients or big sockets separately

- Clutch-Lock with "EasyClick" system: optimised pull-in and release mechanism
- With socket adapter NMA10A21/S for laminating into the socket
- With lamination dummy NMA22A9
- With distal adjustment core
- Easy cleaning and replacing of complete locking unit
- Incl. special sealing grease NMA22A100

Series 500

The lock series 500 from Streifeneder offers a time-saving advantage when manufacturing thermoplastic sockets. Through the simple construction the housing will be completely enclosed by the socket material. The integrated cutting protection allows a fast and safe uncovering of the adjustment core.

Features and Benefits

- Max. patient weight: 125kg
- Clutch-Lock with "EasyClick" system: optimised pull-in and release mechanism
- Housing with pull-in channel
- Mounting height: approx 37mm
- Activity level: 1 to 4
- Can be used for thermoplastic and laminated sockets
- Easy cleaning and replacing of complete locking unit is possible without dismantling the prostheses

Xtend Connect

The Xtend Connect by Lindhe Xtend allows the quick exchange between different prosthetic components. Depending upon the lifestyle and usage needs of the user, the same prosthetic socket can be worn across multiple limbs with the use of this device.

Suitable for both transtibial and transfemoral applications, the system is ideal for quickly disconnecting the prosthetic foot to make dressing easier, or allowing the same limb to be worn with feet set to varied heel heights - without the need to change footwear.

Waterproof*

***Waterproof note:** Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- 150kg weight Limit**
- Quickly exchange feet whilst keeping the same socket, and maintaining optimal alignment of prosthesis
- Change sockets whilst keeping limb builds intact
- Designed to be used with industry standard 30mm systems
- Greater flexibility when dressing - such as removing feet to pull on trousers
- Waterproof in fresh water, sea water and chlorinated water with appropriate care*
- Less baggage - users can pack their activity specific prosthesis without having to pack the entire limb build
- Safety button ensures secure connection from the first step
- Orange wheel colour available

Structural and Socket Components

Lindhe Xtend - Xtend Connect

Ordering Information

Please note: These devices do not have a trial period as standard. If you wish to discuss the Xtend Connect please contact your local product manager for advice prior to placing your order.

Impact Level Descriptions

Low: Daily activities include mostly level ground walking, moving around in the home and the community.

Moderate: Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

High: Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

Torsion Adapters

Torsion Adapters from College Park allow smooth transverse rotation of a patient's limb build. Users can twist and turn with ease allowing a maximum of 20° of both internal and external rotation. Reducing stress and force on the patients' socket and residual limb. Available in a choice of titanium and aluminium or stainless steel. These versatile and durable components can be easily adjusted by prosthetists to improve user comfort when walking and participating in sporting activities.

Features and Benefits

- With +/- 20° of rotation, the additional movement benefits a wide range of users, increasing comfort and allowing for a more natural feeling when turning.
- This adapter is suitable for low to high impact activities.
- The torsion adapter's resistance can be easily adjusted by a prosthetist using a 4mm Allen Key
- A variety of attachment options including male to female pyramid adapter

+/- 20° of rotation

The RevoFit2 by Click Medical allows user adjustability to be built into a variety of socket designs. An adjustable multi-panel socket design provides universal and targeted compression, with every 'click' of the dial providing 1mm of movement.

The RevoFit2 has a high-power dial with a 4:1 mechanical advantage that can be used on any lamination type. It incorporates fatigue-resistant Spectra Lace and low-friction Teflon tubing to withstand the forces and repetitive stress found in an adjustable socket.

Waterproof*

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

RevoFit2 incorporates both configurations as shown:

Features and Benefits

- The ease of releasing tension from the system allows for rapid donning and doffing for bulbous residual limb ends or large volume fluctuations
- Micro/macro adjustments provide 1mm of movement for compression, and can adjust for up to 10ply of sock changes.
- Dial can be mounted to accommodate the patient's functional needs and is easily adjustable through clothes or during activity
- Offers patients the ability to don whilst seated
- Uses strong and fatigue-resistant Spectra Lace
- Low-friction Teflon tubing supplied
- Waterproof system, making it ideal for use in a swimming or bathing prosthesis
- Rated to 100kg loading. For a higher load, a second system can be employed to share excess weight across multiple systems

4:1 mechanical advantage

Numerous dial mounting options

RevoFit2™ Diagnostic Kit

The RevoFit2 diagnostic kit allows socket adjustment early on in development stages. This kit can be easily applied to diagnostic sockets after their successful initial fitting.

Features and Benefits

- User can influence the location of the dial during fitting to ensure it is within easy reach or hidden beneath clothing
- Designed to be added after a diagnostic socket has been produced and the initial socket fitting has taken place, for easy and simple fabrication
- Introducing the kit at socket stage allows flexibility in socket design and configuration of compression windows
- Multiple kits can be applied to the same socket based on the user's needs

The RevoLock Lanyard by Click Medical adjusts tension within the socket to maintain proper suspension, through 2:1 mechanical leverage which balances speed of winding with power. It automatically aligns the limb in the socket, allowing patients to easily draw their limb into the socket and avoid pin lock frustrations.

The dial allows tension to be adjusted under clothing throughout the day, maintaining proper suspension as volume fluctuates. Whilst drawing the liner into the socket, the lanyard cord is neatly stored inside the dial which can be located anywhere on the socket to allow for easy reach.

Waterproof*

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Adjustable tension reduces pistoning
- Serves as both a diagnostic and definitive socket kit
- Eliminates air transfer with distal air lock design
- Offers patients the ability to don whilst seated
- Uses strong and fatigue resistant Spectra Lace
- High lanyard tension with 2:1 mechanical advantage
- Waterproof system, making it ideal for use in a swimming or bathing prosthesis
- Rated to 150kg loading
- Compatible with multiple RevoFit systems
- Maximum travel of 55cm between distal end of socket and end of the lanyard

2:1 mechanical advantage

Numerous dial mounting options

The Click Medical QuickFit Lacers are suitable for both prosthetic and orthotic applications, with low-profile lace guides to quickly dial in fit. Using the easy grip Boa dial, users can easily achieve uniform compression with a one-handed twist to adjust fit in seconds throughout the day. The kits are available in four ready-to-install sizes, which can then be easily replaced on devices without the need to remove the rivets or refabricate.

Features and Benefits

- One-Hand, Micro-Adjustment**
 Uniform compression is easily achieved with a one-handed twist of the easy grip dials, allowing patients with limited fine motor skills to adjust fit in seconds throughout the day
- Pre-Laced System**
 Kit choice and fabrication is made simple with four ready-to-install sizes
- Easily Replaceable Components**
 Easily replace the dial and lace, with no need to remove rivets or re-fabricate device
- Proximal to Distal Tension Pull**
 Even-tension pull proximal to distal means no need to manually redistribute tension as with traditional lacing. Nylon-coated steel lace is low friction and high strength
- Rivet On**
 With double-cap press-fit steel QuickFit rivets, these are retrofittable to other systems and easy to install with the QuickFit Tool, along with durable, low-profile lace guides

Ordering Information

Order No.	Size	Details
NCMOK0180-130-05	X-Small*	Supplied with a low-profile dial, lace and 4 guides. Rivets sold separately. Designed for paediatric footwear size 35 EU/2 UK and smaller.
NCMOK0200-130-05	Small*	Supplied with a low-profile dial, lace and 6 guides. Rivets sold separately. Designed for footwear size 41 EU/7 UK and smaller.
NCMOK0220-130-05	Medium*	Supplied with a low-profile dial, lace and 8 guides. Rivets sold separately. Designed for footwear size 42 EU/8 UK and larger.
NCMOK0240-230-05	Large*	Designed for AFOs and above the ankle boots. Comes with a dial capable of more power, lace and 10 guides. Rivets sold separately.
NCMOK0260-130-05	QuickFit Lacer Starter Kit	Includes everything required to start using QuickFit Lacers: 10 QuickFit Lacers (2 x X-Small, 4 x Small, 4 x Medium), QuickFit Tool and 100 pack of rivets.

*Note: Lacers are sold individually. One pair of footwear requires two kits (one per shoe).

NCMOK0165-230	QuickFit Releasing Lacer, Large	Adds opening functionality to our QuickFit Lacer by adding releasing guides to one side so that the system can fully open like a door for easy donning.

QuickFit™ Strap and Buckle

The Click Medical QuickFit Strap and Buckle are an easy to use fastening solution, allowing for micro-adjustments throughout the day. Each 'click' of the dial decreases strap length by 1mm increments, empowering patients to control comfort for the perfect fit everytime.

The strap is prefabricated, durable, and can be installed in minutes along with the QuickFit buckle. The buckle fastens through a self-locating magnet, providing additional strength and ease of use for those with limited manual dexterity.

QuickFit Strap Features and Benefits

- **Micro-Adjustable**
Empower patients to quickly and easily control fit and comfort throughout the day. Each "click" of the dial decreases the strap length by 1mm for the perfect fit every time
- **Improved Outcomes**
Providing reliable adjustability to optimise fit improves the efficiency of a correctly fitting device
- **Reliable Function**
QuickFit Straps are prefabricated, durable, and can be installed in minutes

QuickFit Buckle Features and Benefits

- **High Durability**
The QuickFit Buckle design prevents the effects of wear and tear experienced with hook and loop fastenings
- **Self-Locating Buckle**
Powerful magnetic buckle clicks itself into place and holds strong throughout the day, promoting ease of use for those with limited manual dexterity or visual impairment
- **One-Handed Use**
Opening and closing can be easily performed with one hand

Aria Valves

Designed specifically for use in transtibial suction sockets of any type, these auto expulsion valves are fairly small, at 22mm diameter and have a low profile. They are best installed using the M10 threaded housing/dummy to drape or laminate over, or they can be retro-fitted into an existing socket by drilling and tapping out the socket material. The Plus version has a push button to release the suction, making it ideal for use with a suction seal liner, such as the 4Seal, whereas the other option has no button, but is fine for use on a suction sleeve system.

Part Number	Description
1 NCA200-AV	Aria Valve - Includes threaded housing (Image shows all black imperial components)
NCA200-AVM	Aria Valve - Includes threaded housing (Image shows black/grey metric components)
2 NCA200-AVP	Aria Valve Plus - Includes threaded housing - with push button components (Image shows all black imperial)
NCA200-AVPM	Aria Valve Plus - Includes threaded housing - with push button (Image shows black/grey metric components)
3 NCA300-HYV	Aria Hybrid Valve - for all elevated vacuum applications. Features a built in barb attachment (with internal check valve) for connection to any vacuum pump system.
4 NCA100-AK	Aria AK Valve Auto Expulsion (Including Grip Key)
5 NCA-100-MV	Aria Universal Mini Valve
6 NCA300-B90	90-Degree Stainless Steel Barb
7 NCA300-AVT	Aria Valve Tool - this allows a valve to be screwed in or out, even when mounted in a recess and the other end is for removing the valve caps.
8 NCA300-ASBM	Aria Safety Barb- features a 90 degree swivel fitting and an internal 1-way safety valve to prevent loss of vacuum in the case of hose disconnect or pump/hose malfunction. This part number is for the metric thread.

Pee Wee Valve SI

This small, manually operated valve has a high air flow capacity. Its low profile design, at only 14.2mm diameter and 6.3mm high, makes it suitable for both lower and upper limb applications. It can be retro-installed by drilling and tapping through the socket. A threaded housing is also available to allow it to be used in soft thermoplastic sockets. Threaded housing NPA-PWSI-H.

Part Number	Description
9 NPA-PWSI	Pee Wee Valve SI
NPA-PWSI-H	Threaded Housing

Lyn Valve BK /BK2

These valves are similar to the Aria Valves, but in white and with a slightly slower airflow rate. The BK functions in the same way as the Aria Valve and the BK2 functions like the Aria Valve Plus.

Part Number	Description
10 NPA0202M	Lyn Valve BK2 Metric Thread
NPA0222M	Threaded Housing
NPA0200M	Lyn Valve BK Metric Thread

RV Slide

This auto expulsion valve allows air to be evacuated through it when closed, by simply sliding the button to one side, in any direction, the valve opens and remains open until the button is slid back into the centre, with an audible click to indicate that the valve is then closed. It can be used with any socket material, on transfemoral or transtibial sockets designed to be used with suction seal type liners.

Part Number	Description
11 NPA0400	Lyn Valve RV Slide

Structural and Socket Components

Suction Valves and Exoskeletal Components

High Vac Barb/HV Socket Port

Designed for use with vacuum systems, the High Vac Barb can be retro-installed by drilling and tapping through the socket, or by using the Pee Wee threaded housing NPA-PWSI-H. The top section swivels in the housing and there is an integral valve to prevent sudden loss of suction should the vacuum system fail in some way. For transfemoral applications the HV Socket Port can be included to enable the socket to be donned more easily, since with the plug removed a large volume of air can be expelled quickly, or a donning sleeve can be used and the plug then refitted to provide a secure seal.

Part Number	Description
1 NPA0089	High Vac Socket Port
1 NPA0090	High Vac Barb

Lyn Valve RV

Available as either an auto or manual expulsion valve, these large diameter valves are suitable for transfemoral applications, especially when used in conjunction with suction seal liners. With the valve removed from its housing, the patient is able to expel the air quickly and see how well they have donned the socket. The valve has no holes that may become blocked, or trap the skin, when not used with a liner.

Part Number	Description
2 NPA0002	Lyn Valve RV/Auto Expulsion
NPA0300	Lyn Valve RV/Manual Expulsion

GLP Standard Valve

The standard valve lets air flow out when the button is pressed.

Part Number	Description
3 NF008001	GLP Standard Valve, complete with valve housing.

GLP Rubber Valve

The rubber valves snap in place and are a simple alternative for prostheses with flexible inner sockets.

Part Number	Description
4 NF008111	GLP Rubber Valve, complete with valve housing.

Flat Rubber Valve

The flat rubber valve can be pushed into an aperture cut into the socket, or into the NE-V01 housing. It provides a simple alternative for prostheses, whatever the socket material.

Part Number	Description
5 NV02	Flat Rubber Valve, with thumb flap, without valve ring. Inside diameter 24mm.
6 NE-V01	Valve Ring

Trulife Seattle Lamination Blocks

Part Number	Description	Weight Limit
7 NSAB310	Seattle Ankle Block, Standard - designed for use with Seattle Lightfoot ² NSLF195/198.	136kg
8 NSAB320	Seattle Ankle Block, Low Profile - designed for exoskeletal setup of the Seattle Natural foot models (NSNF160/163/170/173) and Seattle SACH foot models NSCH110/113/120/123.	102kg

Wooden Attachment Blocks

For better connection with laminate and for easier sanding.

Part Number	Description
9 NMA12A7	Socket Attachment Block - with poplar wood, 4 countersink head bolts 22A5/M6x20 including lamination dummy 12A3/E2 and sealing grease 22A100 with plastic for optimal sanding.

Paediatric

The Scout foot by College Park incorporates consistent energy return and adaptable growth plates which allows the foot to accommodate for growth. Using College Park's Intelliweave® technology alongside a durable carbon fibre material, this paediatric foot provides strength, smooth motion and flexibility. This maintenance free foot is available in four different mounting options to meet specific needs, and is lightweight and fresh water friendly.

Waterproof* (fresh water only)

*Waterproof note: Following exposure to chlorinated water, rinse immediately with fresh water and dry.

Features and Benefits

- Accommodates limb growth with the use of stackable growth plates and size up foot shells
- Hybrid material for ultimate strength and flexibility
- Four different mounting options
- Effective energy return
- Lightweight
- Waterproof in fresh water*

Ordering Information

Trial Period - This foot has a 30 day trial period.

Impact Level Descriptions

Low : Daily activities include mostly level ground walking, moving around the home and the community.

Moderate: Daily activities include up to unlimited walking, climbing stairs and occasional moderate lifting (this does not include running).

High: Daily activities include fast walking, jogging, running, lifting heavy objects and/or recreational sports.

The durable Truper foot was designed to take on the toughest of childhood challenges by combining stability and dynamic response. The foot stores and releases energy while in use, allowing for a smooth and controlled transition from standing to running. The inversion/eversion and superior transverse rotation provides exceptional ground compliance; improving performance and stability, whether walking or running.

The foot is available in two size ranges, which allows the foot size to be increased simply by purchasing the next size foot shell and sole plate, making it a cost-effective and flexible solution for a growing child.

Note: Sizes 16-18cm are supplied with blue ankle and sizes 19-21cm are supplied with a purple ankle

Features and Benefits

- Versatile finishing capability
- Sandal toe design allows for a choice of shoes
- Reduces fatigue and protects the residual limb
- Adjustable Stride Control™ to customise child's gait
- Sealing boot interlocks with the foot shell to prevent any debris from entering the foot

Cosmetics

Seattle Child's Play® Energy Foot

The Child's Play Energy foot is a paediatric version of the Seattle Energy. Its integral cosmesis varies by size to reflect the natural appearance of a child's maturing foot and provides shock absorption at heel strike, whilst the composite keel allows a smooth roll-over with dynamic response at toe-off for a natural gait. Depending on the child's weight and foot size, there are six keel options to choose from to help optimise the foot's action.

***Water-resistant:** Safe for contact with water and occasional submersion. Rinse immediately with fresh water and dry following exposure to water, particularly salt or chlorinated.

Features and Benefits

- Low profile selectable keel design
- Smooth roll-over and dynamic response
- Natural appearance
- Lightweight
- Choice of foot shell colours
- Sandal toe (sizes 16-21)
- Large range of sizes (13-21)
- Safe for occasional contact with water, but not intentional, frequent contact or submersion. After contact with salt or chlorinated water, foot should be rinsed/cleaned.

NSSY303	Child's Play Symes Nut, 19-21cm	65kg

Category Selection Instructions

To determine which keel is appropriate for your patient, check the below table for keel availability by foot size. Please note that size 13-15 feet do not have sandal toe foot shells.

Important Note: Choose the next higher keel level if your patient has a long BK limb, regularly carries heavy loads, or is at the upper limit for weight or impact level.

Warning: Choosing a lower strength category than what is suggested based on the above procedure and patient data will void the warranty. If your patient's weight exceeds the limits of the chart, please browse the catalogue for other foot options or contact our customer services department.

This lightweight polycentric knee is a robust unit with all the features you'd expect from a child's knee, but with one very useful additional feature. It has the facility to be set up as a semi auto or manual knee lock. This makes it particularly suitable for a child with bilateral limb loss, or with other functional issues, such as muscle weakness in the sound limb.

The lock can easily be removed should the child's ability not require it, or when an appropriate level of rehabilitation has been achieved. It can be just as easily replaced should there be a deterioration in function, such as following surgery.

Features and Benefits

- Polycentric design
- Lightweight
- Friction control of swing phase
- Extension assist
- Adjustable stance stability
- Optional manual lock
- Knee disarticulation adapter available (replaces the removable pyramid)
