

Better needles.
Better needling treatments.
*Better patient and
practitioner experiences.*®

*Red Coral Premium Needles for
Dry Needling and Acupuncture*

Our goal is to provide a better standard of Eastern and Western health care. We consult directly with experienced medical, health and rehabilitation professionals in the production of our dry needling and acupuncture products. All our needles are made with high-grade German steel and we were the first to design and build a purpose-built dry needling needle. The result are premium needles that benefit patients and practitioners alike.

The Ideal Needle for Dry Needling *and Why*

Dry Needling uses deep tissue work to stimulate myofascial trigger points to ease pain, cure injuries and speed-up recovery. It requires a lot of dexterity and deeper needle insertions. For years Dry Needling practitioners improvised with needles that weren't made for Dry Needling. Red Coral worked closely with educators and practitioners to create the first purpose-built dry needle. We continue to work with educators and practitioners to innovate and evolve our needles. Myotech 2.0 Elite Dry Needles® are the latest evolution that features two dry needle innovations.

Thicker, conductive handle with etched grip

- + Better dexterity when handling, particularly on deeper insertions
- + Quicker to e-stim to confirm placement and accelerate healing

Stronger German surgical steel that stays sharp

- + Won't bend or break during deeper insertions
- + Allows for multiple insertions with each needle

Full needle parylene coating for green chemistry lubrication

- + Easier to penetrate patient skin and tissue for tougher trigger points and deeper insertions
- + A near painless patient experience

Thicker Needle Diameters

- + Easier to handle
- + Won't break on deeper insertions
- + Allows for longer needle lengths and deeper trigger point penetrations

Holding-tab and glue free guide tube

- + One-handed needle insertions
- + Reduced waste and time

Longer Needle Lengths

- + Allows for deeper trigger point penetrations

Micro-channeling

- + Easier to penetrate patient skin and tissue for tougher trigger points and deeper insertions
- + A near painless patient experience

“Having practiced and taught Myofascial Dry Needling since 1986, I have used a great variety of needles, without doubt Myotech is the best I have used.”

Andrew Gallagher,
Consultant Physiotherapist
(Pain Management), Senior
Lecturer at The Myofascial Pain
Study Centre, Melbourne

The Science Behind the Needle

Myotech 2.0 Elite Dry Needles®

The first purpose-built dry needle that is designed and made for the strength and dexterity needed for deeper insertions while limiting patient discomfort and improving practitioner efficiency. The Myotech 2.0 now has an even thicker handle and features a glue free holding tab.

Features

- + Stronger German surgical steel
- + Needle surface micro-channeling
- + Full needle parylene coating
- + Thick conductive handle with etched grip
- + High-visibility, holding tab and glue free guide tube

Available Needle Gauges and Lengths

Even Better Needles for Better Patient and Practitioner Experiences

The first generation Myotech needle featured several innovations that made a marked difference in patient comfort and practitioner ease of use during dry needling treatments.

- > German surgical steel that does not break or bend during deeper insertions, and stays sharp through multiple insertions
- > Thicker etched handle and bigger needle sizes that make the needles easier to handle and go deeper
- > Full needle parylene coating that allows for near painless insertions
- > Microscopic grooves along the needle shaft that provide micro-channels to reduce surface area. Significantly reducing the force needed for insertions
- > Holding tab free, glued guide tube for easy one-handed aim, snap, and tap insertions

The 2nd generation Myotech needle adds two new, patent pending technologies and features that further limit patient discomfort and enhance practitioner efficiency and effectiveness.

- > A double clamped, 30% thicker handle that improves dexterity and strength
- > Glue-free guide that uses a dimple inside the tube for more efficient aim and tap insertions

DRY NEEDLING NEEDLES

Premium

The only Japanese style needle to be produced with high-grade German steel for absolute comfort with a holding tab free guide tube for single handed use and reduced waste.

Features

- + High grade German surgical stainless steel
- + Full needle green polymer chemistry parylene coating
- + No holding tab for quicker one-handed aim and insert application and less mess
- + TGA, FDA, CE, and Health Canada certified

“I have found the Red Coral Needles really great to use... I do a lot of facial acupuncture and need to use gentle needles.”

Bec Haas

The Ideal Acupuncture Needle *and Why*

The same thinking, science and technology that goes into our premium dry needling needles goes into our premium acupuncture needles.

The results are the same. Better treatments and better patient and practitioner experiences.

Two different handles:

J-Type and Spring

+ Two choices to suite your practice style

Stronger German surgical steel that stays sharp and will not break

+ Allows for light touch insertions

Full needle parylene coating for green chemistry lubrication

+ Easier to penetrate patient skin

+ A near painless patient experience

Thicker Needle Diameters

+ Easier to handle and won't break

+ Allows for longer needle lengths

Holding-tab and glue free guide tube

+ One-handed needle insertions

+ Reduced time and waste

Longer Needle Lengths

+ Allows for deeper trigger point or motor point penetrations

"I love the Red Coral brand needles... they work with such ease."

Dr. Debbie Ball, Chiropractor

PREMIUM ACUPUNCTURE AND TRIGGER POINT NEEDLES

J-Type Needle

Our J-Type needles are ideal for both acupuncture and trigger point therapy. Handles are color coded by gauge. Needles are made from German steel.

Features

- + Color coded molded plastic handle to easily identify gauge
- + High grade German surgical stainless steel that stays sharp
- + Full needle green polymer chemistry parylene coating
- + No holding tab, glue-free for quicker one-handed aim and insert application and reduced mess
- + Smooth needle surface for virtually pain free insertions
- + TGA, FDA, CE, and Health Canada certified

Natural Needle

Silver spring type handled needles made with German surgical steel and a full needle parylene coating, not commonly used in entry level needles. Great for TCM acupuncture.

Features

- + High grade German surgical stainless steel
- + Traditional silver spring type handle
- + Lightweight with a super fine needle tip
- + Guide tubes
- + TGA, FDA, CE, and Health Canada certified

"I couldn't be happier with Red Coral! I love the product, and have experienced excellent service at all times!"
